TITLE A Tool Kit for Healthy School Meals: Recipes and Training Materials. USDA's New School Lunch and Breakfast Recipes.

INSTITUTION Department of Agriculture, Washington, DC.

PUB DATE 1995-10-00

NOTE 340p.

PUB TYPE Guides - Non-Classroom (055)

EDRS PRICE MF01/PC14 Plus Postage.

DESCRIPTORS Breakfast Programs; Elementary Secondary Education; *Food Service; Lunch Programs; *Recipes (Food); Resource Materials; Staff Orientation

IDENTIFIERS Department of Agriculture; Healthy Kids Initiative

ABSTRACT

This kit contains a recipe book and various separately published materials to train food service staff in implementing the new breakfast and lunch menus from the U. S. Department of Agriculture (USDA). A training manual provides background information on recipe selection, development, and testing; orients staff to the recipe format; explains and demonstrates the uses of the nutrient analysis provided for each recipe; and includes instructions on substituting ingredients and adjusting recipes, as well as tips for maximizing quality. Also included in the kit is a booklet suggesting ways to encourage students to stay on campus for meals, such as marketing new menus, garnishing meals, creating Mexican or Asian theme meals, and tailoring school menus to the community and the school; and getting staff, teachers, and parents involved in mealtimes. A set of step-by-step instructions for building a promotional kiosk, is also included. An additional booklet features photographs of sample meals from the USDA's new breakfast and lunch recipes. The cookbook itself, designed for a loose leaf binder, is comprised of approximately 80 recipes divided into the following sections: (1) grains/breads; (2) desserts; (3) main dishes; (4) salads/salad dressings; (5) sandwiches; (6) sauces and gravies; (7) soups; (8) vegetables; and (9) breakfasts. Recipes give ingredients and directions to prepare 50 or 100 servings, allow space to write in different numbers of servings, and provide a nutrient analysis. (KB)

USDA's NEW SCHOOL LUNCH AND BREAKFAST RECIPES

A Tool Kit for Healthy School Meals!

Breakfast Burrito with Tomato Salsa. Tabouleh. Chicken Stir-Fry. Baked Cajun Fish. Vegetable Chili. Sound good?

These are just a few of the more than 50 recipes USDA has developed as part of the Healthy Kids Initiative. The recipes are designed to help you serve "Total Quality School Meals" to your young customers. "Total Quality School Meals" are meals that

- ▷ taste good
- ▷ are nutritious
- ▷ are attractive

Why are "total quality" school meals so important? Because children's health is important!

Schools have a special role in enhancing and maintaining children's health since roughly one-quarter of a young person's time is spent in this environment. School meal programs can help foster healthful behaviors, particularly in the areas of nutrition and physical fitness.

By serving wholesome and attractive meals at school, you can help children improve their attitudes towards education and health. You can also help them have healthier lives...now and in years to come.

To help you use the new recipes from USDA, this training manual:

- ▷ provides background on how the recipes were selected, developed, and field-tested
- ▷ takes you through each section of the recipe format, explaining how the information is organized
- ▷ explains and demonstrates the uses of the nutrient analysis provided for each recipe
- ▷ includes instructions on substituting ingredients and adjusting recipes, as well as tips for maximizing quality

WHAT'S SPECIAL ABOUT THE NEW RECIPES?

What's special about the new recipes? Plenty!

For one thing, the recipes reflect what's happening with nutrition today.

You'll find them to be as low in fat as possible, without losing flavor and appeal. They include lots of fruits, vegetables, and grains, and they'll help you add variety.

A menu of these new recipes will be a *healthy* experience for children. You'll be giving them needed nutrients and energy — without a lot of added fat. You'll also be helping them *learn* what it means *to eat for good health*.

The recipes will help you "win kids over" with some exciting new flavors...and help you prepare some of their all-time favorites in ways that make them more healthful.

A palette of diverse cultures is presented here. You'll find, for example, Tabouleh and a Gyro Sandwich from the Middle East...Stir-Fry and Teriyaki Sauce from the Orient.

Adding a taste of Europe are such things as French Toast Sticks from France, Baked Fish Scandia from the Netherlands, Herbed Broccoli and Cauliflower Polonaise from Poland, and Minestrone, Vegetable Lasagna, and Chicken Tetrazzini from Italy.

The recipes also reflect the rich diversity of the United States. Southwest flavor is unmistakable in several. There are Chicken Fajitas, Marinated Black Bean Salad, Taco Pie, Vegetable Chili, and Arroz con Queso (Rice with Cheese), to name a few. The popular taste of New Orleans culture is found in the Baked Cajun Fish.

The recipes have been carefully developed with both kids' TASTES and their good HEALTH in mind.

To support the ideal of lowered fat, the recipes call for reduced-fat mozzarella and cheddar cheeses as well as reduced-fat mayonnaise, lowfat milk, and lowfat yogurt.

Versions of lower fat Brownies and Chocolate Cake are included, using applesauce as a fat substitute. The taste of the recipes is the same familiar one, just the fat content has been changed.

The use of low-sodium soup and gravy bases helps to reduce the sodium level in the recipes.

AND, the recipes have been designed with YOU — the food preparer — in mind.

We hope that as you read through and finally use these recipes, you will get a sense of our efforts to tailor the recipes to your needs. We've written the recipes with a limited number of steps, bearing in mind the equipment which you might have available.

WHAT RECIPES WILL LICK YOU UP?

The standardized recipes provided for you in this packet are designed to help you serve healthful, attractive breakfasts and lunches that will appeal to your student customers. To meet the needs of today's school foodservice programs, recipes must:

- ▷ be acceptable to students
- ▷ be economical
- ▷ be lower in fat and moderate in the use of added salt
- ▷ use the minimum number of ingredients and steps for preparation
- ▷ make maximum use of USDA-donated commodities
- ▷ accommodate regional and local needs and preferences

By using these recipes, you should be able to do the following:

1) Ensure product quality.

The recipes developed for this project were field-tested in seven regions across the United States by foodservice managers, employees, and students.

Taste panels of adults, and later students, rated products for their texture, taste, aroma, appearance, and overall quality. As a result of this testing, the recipes were adapted to meet the needs of your students.

2) Accurately predict number of portions.

This will allow you to simplify purchasing procedures, reduce the amount of unnecessary inventory, and eliminate excessive amounts of leftovers.

3) Adjust the flavoring of each recipe to meet the expectations of your students.

Many of the recipes provide information concerning additional ingredients that can be used to adjust the overall flavor of a recipe to more closely meet regional preferences. You'll find these listed on individual recipe cards under optional ingredients or in a section called "Special Tips."

4) Obtain maximum benefit from the use of USDA-donated foods.

Because schools often use USDA-donated foods in preparing meals, many of the recipes were developed and tested using available USDA commodities. This will help ensure that the final product of any recipe produced in the field will meet the same high standards for *quality* and *quantity* intended by the recipe developers.

5) Evaluate the nutritional value of each recipe.

A nutritional analysis has been provided for each of the recipes. All of the recipes have been developed with the goal of expanding variety, reducing the overall level of added fat, and increasing dietary fiber.

6) Evaluate the specific contribution of each recipe toward the School Lunch Food-Based Menu System.

For your convenience, the food contribution toward the School Lunch Food-Based Menu System for each portion of a recipe is specified on the recipe format.

7) Increase employee confidence.

The recipes provide clear, concise directions that cover all aspects of production. This will help improve employee morale by reducing the confusion associated with non-standardized recipes.

First-rate results will also boost morale. The recipes are reliable and will produce consistent, high-quality meals. Employees will be confident and proud that they are serving the best quality products available.

Quality - Quality - Quality

The items you serve to each student are only as good as the quality of ingredients put into each recipe!

To ensure first-rate results:

◆ **Purchase the finest quality possible.**

If the brand of lemon gelatin you select is weakly flavored because it is inexpensive, you will not have a strong lemon flavor in the end product.

If the brand of chicken base has "salt" listed as the first ingredient, meaning it is the most *prevalent* ingredient, your Cream of Chicken Soup will not have a meaty chicken flavor.

◆ **Store and handle carefully.**

If the broccoli you put into the Broccoli Salad is old, dried, and wilted, the salad will not be crisp. And, many nutrients will be lost by the time you serve it.

If the frozen green beans in the Corn and Green Bean Casserole have been improperly handled by either the distributor or you — thawed and refrozen, thawed and refrozen — your end product will not be of the best quality possible.

Purchase from reliable sources and check your storage and handling procedures to assure topnotch *quality - quality - quality*.

◆ **Check your cooking techniques.**

If your cakes and brownies are overbaked because you are not using an oven thermometer to maintain exact oven temperatures, they will be dried out, tough, and crumbly.

If the Stir-Fry is not cooked in batches, or if it is *held* for a long period of time, the vegetables will not be brightly colored and crispy. They will be limp and uninviting.

Batch-cooking is cooking in small quantities to maintain high quality throughout the serving period. Each preparation should not exceed what can be served on the line in 15 minutes. This means there will be *continuous* cooking throughout the meal to guarantee quality.

Working With The New Recipes

On the following pages, we'll take a close look at how the information is organized on the recipe cards.

In this first example, the top section of the Chicken Stir-Fry recipe is highlighted.

Stir-Fry (Chicken, Beef, Pork)

Meat • Vegetable

Main Dishes D-39

Ingredients	50 Servings		100 Servings		For _____ Servings	Directions
	Weight	Measure	Weight	Measure		
Low-sodium soy sauce		1 cup		2 cups		1. Dissolve cornstarch in soy sauce. Add spices.
Cornstarch.....	4 oz	2 Tbsp	8 oz	1 1/4 cups		
Ground ginger	1/2 tsp		1 tsp			
Granulated garlic	3 Tbsp		6 Tbsp			
White pepper	2 tsp		1 Tbsp 1 tsp			
Low-sodium chicken stock, non-MSG		2 qt		1 gal		2. Heat chicken stock to a boil and slowly stir in cornstarch mixture. Return to a simmer. 3. Cook for 3 to 5 minutes, until thickened. Remove from heat.
Fresh mixed vegetables: •Fresh broccoli, chopped.....	5 lb 10 oz	2 gal	11 lb 4 oz	4 gal		Prepare no more than 50 portions per batch.
•Fresh carrots, peeled, 1/4" slices	5 lb 10 oz	1 gal 2 cups	11 lb 4 oz	2 gal 1 qt		
•Onions, diced.....	1 lb 4 oz	1 qt	2 lb 8 oz	2 qt		
OR						
†Frozen mixed Oriental vegetables	12 lb 8 oz	3 gal 2 qt	25 lb			4. Sauté sliced carrots in oil for 4 minutes. Add onions, cook for 1 more minute. Add broccoli and cook for 2 more minutes. Remove to steam table pan. Keep warm.
Vegetable oil		1/2 cup		1 cup		
Skinless, boneless chicken breasts, cut 2" x 2" Vegetable oil	9 lb	1 cup	18 lb	2 cups		5. Sauté chicken in oil for 3 to 5 minutes until no signs of pink remain. Add chicken to vegetables in steam table pan. Add sauce and mix to coat chicken and vegetables. Heat to serving temperature.

At the top of the card, you'll find:

- the recipe title
- the recipe file location, which you will use to add the recipe to the USDA quantity recipes you already have (*Quantity Recipes for School Food Service, Program Aid #1371*)
- the recipe's contribution to the School Lunch Food-Based Menu System Guidelines

BEST COPY AVAILABLE

Here are more details on each:

◆ **The recipe title:**

Recipe titles have been kept as straightforward as possible. Descriptive words related to regions, texture, or flavor have been avoided. Phonetic pronunciations have been provided for the recipes when necessary.

◆ **The recipe's contribution to the School Lunch Food-Based Menu System Guidelines:**

This indicates the general area/areas in which a particular recipe contributes to the School Lunch Food-Based Menu System. Our sample recipe, Chicken Stir-Fry, contributes to both the Meat and Vegetable categories.

◆ **Recipe file location:**

In this package you will find new recipes from the following nine categories:*

- B. Bread and Cereal Products
- C. Desserts
- D. Main Dishes
- E. Salads and Salad Dressings
- F. Sandwiches
- G. Sauces, Gravies, and Seasoning Mixes
- H. Soups
- I. Vegetables
- J. Breakfast

*Please note that this package does not include Category A because there were no additions to it. Please refer to your original file for Category A. Also please note that Category J, Breakfast, is new.

Each recipe in the collection has been assigned: (1) a specific category and (2) a number indicating its place within this category.

For example, a recipe with a designation of C-17 would indicate that this recipe is #17 within the Desserts category.

❖ **Ingredients:**

In this next example, the *first column* of the Chicken Stir-Fry recipe is highlighted. This section lists the ingredients.

Stir-Fry (Chicken, Beef, Pork)

Meat • Vegetable

Main Dishes D-39

Ingredients	50 Servings		100 Servings		For Servings	Directions
	Weight	Measure	Weight	Measure		
Low-sodium soy sauce	4 oz	1 cup	8 oz	2 cups		1. Dissolve cornstarch in soy sauce. Add spices.
Cornstarch		2 Tbsp		1/4 cup		
Ground ginger		1/2 tsp		1/4 cups		
Granulated garlic		3 Tbsp		1 tsp		
White pepper		2 tsp		6 Tbsp		
				1 Thsp	1 tsp	
Low-sodium chicken stock, non-MSG		2 qt		1 gal		2. Heat chicken stock to a boil and slowly stir in cornstarch mixture. Return to a simmer.
						3. Cook for 3 to 5 minutes, until thickened. Remove from heat.
Fresh mixed vegetables: *Fresh broccoli, chopped	5 lb 10 oz	2 gal	11 lb 4 oz	4 gal		Prepare no more than 50 portions per batch.
*Fresh carrots, peeled, 1/4" slices	5 lb 10 oz	1 gal 2 cups	11 lb 4 oz	2 gal 1 qt		
*Onions, diced	1 lb 4 oz	1 qt	2 lb 8 oz	2 qt		
OR						
+Frozen mixed Oriental vegetables	12 lb 8 oz	3 gal 2 qt	25 lb			4. Sauté sliced carrots in oil for 4 minutes. Add onions, cook for 1 more minute. Add broccoli and cook for 2 more minutes. Remove to steam table pan. Keep warm.
Vegetable oil		1/2 cup		1 cup		
Skinned, boneless chicken breasts, cut 2" x 2"	9 lb	1 cup	18 lb	2 cups		5. Sauté chicken in oil for 3 to 5 minutes until no signs of pink remain. Add chicken to vegetables in steam table pan. Add sauce and mix to coat chicken and vegetables. Heat to serving temperature.
Vegetable oil						

❖ First, note *the order* in which ingredients are listed:

Ingredients are listed in the same order as they are required for production. Horizontal lines separate into groups the ingredients that are used together.

❖ Second, note *the form* in which ingredients are listed.

You'll see that our sample recipe specifies:

Fresh carrots, peeled, 1/4" slices

This tells you the carrots are to be purchased fresh, peeled, and then sliced into 1/4"-thick slices prior to being used in the recipe.

❖ On all of the recipes:

The purchase state of the ingredient (such as fresh, frozen, canned) appears before the ingredient name. And, the form of the ingredient (such as peeled, sliced, etc.) comes after the ingredient name.

BEST COPY AVAILABLE

In order to obtain the maximum possible quality during production, it is *very important* that you follow the recipe exactly. The *purchase state* (fresh, canned, frozen, etc) of your ingredients and *the form* (peeled, sliced, etc.) should always be the same as listed in the recipe.

All of the recipes will be equally successful whether USDA-donated commodity foods or commercially available ingredients are used. However, where possible, the recipes have been developed and standardized using USDA commodity products.

When purchasing ingredients, remember to:

▷ **Select the best possible quality.**

The quality of the final product will rely heavily on the quality of ingredients used.

▷ **Purchase products that will produce the "healthiest" overall product.**

For example, our sample recipe for Chicken Stir-Fry calls for chicken stock, non-MSG (without monosodium glutamate). When purchasing bases, select brands that do not contain MSG and that have a moderate level of sodium (salt).

Read food labels carefully. Food manufacturers must list ingredients in descending order of predominance by weight. So, if salt is the first ingredient listed, you know that the product contains more salt than anything else.

⇒ Alternative ingredients:

Alternative ingredients are listed in many of the recipes to give you flexibility when ordering. They may also help you accommodate limitations in labor or equipment.

This example shows how alternative ingredients appear in the recipe format. Several lines are highlighted.

Stir-Fry (Chicken, Beef, Pork)

Meat • Vegetable

Main Dishes D-39

Ingredients	50 Servings		100 Servings		For Servings	Directions
	Weight	Measure	Weight	Measure		
Low-sodium soy sauce	1 cup		2 cups			1. Dissolve cornstarch in soy sauce. Add spices.
Cornstarch	4 oz	2 Tbsp	8 oz	1/4 cup		
Ground ginger	1/2 tsp		1 tsp			
Granulated garlic	3 Tbsp		6 Tbsp			
White pepper	2 tsp		1 Tbsp 1 tsp ..			
Low-sodium chicken stock, non-MSC	2 qt		1 gal			2. Heat chicken stock to a boil and slowly stir in cornstarch mixture. Return to a simmer.
						3. Cook for 3 to 5 minutes, until thickened. Remove from heat.
Fresh mixed vegetables: *Fresh broccoli, chopped	5 lb 10 oz	2 gal	11 lb 4 oz	4 gal		Prepare no more than 50 portions per batch.
*Fresh carrots, peeled, 1/4" slices	5 lb 10 oz	1 gal 2 cups ..	11 lb 4 oz	2 gal 1 qt ..		
1 lb 4 oz	1 qt	2 lb 8 oz	2 qt			
*Onions, diced						
OR						
†Frozen mixed Oriental vegetables	12 lb 8 oz	3 gal 2 qt	25 lb			4. Saute sliced carrots in oil for 4 minutes. Add onions, cook for 1 more minute. Add broccoli and cook for 2 more minutes. Remove to steam table pan. Keep warm.
Vegetable oil	1/2 cup		1 cup			
Skinless, boneless chicken breasts, cut 2" x 2"	9 lb		18 lb	2 cups		5. Saute chicken in oil for 3 to 5 minutes until no signs of pink remain. Add chicken to vegetables in steam table pan. Add sauce and mix to coat chicken and vegetables. Heat to serving temperature.
Vegetable oil	1 cup					

In the Chicken Stir-Fry example:

As you can see, alternative ingredients are listed on separate lines separated by the word "OR." It is important that you select only *one* of the options provided. Do *not* add both the primary and the alternative ingredients to the recipe.

You may choose to use the fresh mixed vegetables listed in the ingredients.

- OR -

You may choose to use the alternative, frozen mixed Oriental vegetables.

❖ Optional ingredients:

Some of the recipes include optional ingredients. These are typically used for seasoning and garnishing. If an ingredient is optional, the word "(optional)" will immediately follow it on the ingredient list.

Optional ingredients may be used to increase a recipe's appeal in a particular area or region. While certain ingredients may be preferred by students in some regions of the country, they may not appeal to others.

Optional ingredients may also be used to change the meal pattern contribution.

However, it's important to note that optional ingredients are *not included* in the School Lunch Food-Based Menu System contribution or the Nutritional Analysis.

It's also important to note that there are no special instructions under "Directions" for using the optional ingredients.

❖ Weights and measures for 50 and 100 servings:

In this example, the *center* of the recipe format is highlighted. This section provides the quantities you will need for producing 50 and 100 portions of the recipe.

Stir-Fry (Chicken, Beef, Pork)

Meat • Vegetable

Main Dishes D-39

Ingredients	50 Servings		100 Servings		For Servings	Directions
	Weight	Measure	Weight	Measure		
Low-sodium soy sauce	1 cup	2 cups	1. Dissolve cornstarch in soy sauce. Add spices.
Cornstarch.....	4 oz	2 Tbsp	8 oz	1½ cups	
Ground ginger	½ tsp	1 tsp	
Granulated garlic	3 Tbsp	6 Tbsp	
White pepper	2 tsp	1 Tbsp 1 tsp	
Low-sodium chicken stock, non-MSG	2 qt	1 gal	2. Heat chicken stock to a boil and slowly stir in cornstarch mixture. Return to a simmer. 3. Cook for 3 to 5 minutes, until thickened. Remove from heat.
Fresh mixed vegetables: *Fresh broccoli, chopped..... *Fresh carrots, peeled, ½ slices	5 lb 10 oz	2 gal	11 lb 4 oz	4 gal	Prepare no more than 50 portions per batch.
*Onions, diced..... OR †Frozen mixed Oriental vegetables	5 lb 10 oz	1 gal 2 cups	11 lb 4 oz	2 gal 1 qt	4. Sauté sliced carrots in oil for 4 minutes. Add onions, cook for 1 more minute. Add broccoli and cook for 2 more minutes. Remove to steam table pan. Keep warm.
Vegetable oil	1 lb 4 oz	1 qt	2 lb 8 oz	2 qt	
Skinless, boneless chicken breasts, cut 2" x 2"..... Vegetable oil	12 lb 8 oz	3 gal 2 qt	25 lb	5. Sauté chicken in oil for 3 to 5 minutes until no signs of pink remain. Add chicken to vegetables in steam table pan. Add sauce and mix to coat chicken and vegetables. Heat to serving temperature.	

Weight measurements are given for dry and solid ingredients.

The weight measurements are written in pounds (lb) and ounces (oz).

Because it is sometimes necessary to use volume measure, the volume equivalents have also been provided for the dry and solid ingredients if the amount is more than 2 ounces.

Volume measurements are given for liquid ingredients.

The volume measurements include:

- ▷ teaspoons (tsp)
- ▷ tablespoons (Tbsp)
- ▷ cups
- ▷ quarts (qt)
- ▷ gallons (gal)

Spices, flavorings, and other ingredients of 2 ounces or less are given a volume measurement since most scales are not able to measure such a small quantity accurately.

A note about baking:

When measuring dry ingredients you will be using in a baked product, it is very important that you measure the ingredients by *weight* whenever possible. This is because even slight variations in measurement can alter the quality of the final product.

Consider the following:

- ▷ One pound of *unsifted* all-purpose flour can range from $2\frac{1}{2}$ cups to 4 cups.
- ▷ One pound of *sifted* all-purpose flour can range from 3 cups to $4\frac{1}{2}$ cups.

These examples make it easy to see why measuring the flour for a baked product only by *volume* can result in an inconsistent product.

► Directions:

In our next example, the far-right column is highlighted. This section lists all the steps needed to prepare the recipe.

Stir-Fry (Chicken, Beef, Pork)

Meat • Vegetable

Main Dishes D-39

Ingredients	50 Servings		100 Servings		For Servings	Directions
	Weight	Measure	Weight	Measure		
Low-sodium soy sauce	1 cup	2 cups.....	1. Dissolve cornstarch in soy sauce. Add spices.
Cornstarch	4 oz	3/4 cup 2 Tbsp	8 oz	1 1/4 cups	
Ground ginger	1/2 tsp	1 tsp	
Granulated garlic	3 Tbsp	6 Tbsp	
White pepper	2 tsp	1 Tbsp 1 tsp	
Low-sodium chicken stock. non-MSC	2 qt	1 gal	2. Heat chicken stock to a boil and slowly stir in cornstarch mixture. Return to a simmer. 3. Cook for 3 to 5 minutes, until thickened. Remove from heat.
Fresh mixed vegetables: *Fresh broccoli, chopped	5 lb 10 oz	2 gal	11 lb 4 oz	4 gal	Prepare no more than 50 portions per batch.
*Fresh carrots, peeled, 1/4" slices	5 lb 10 oz	1 gal 2 cups	11 lb 4 oz	2 gal 1 qt	
*Onions, diced	1 lb 4 oz	1 qt	2 lb 8 oz	2 qt	
OR	
†Frozen mixed Oriental vegetables	12 lb 8 oz	3 gal 2 qt	25 lb	
Vegetable oil	1/2 cup	1 cup	4. Sauté sliced carrots in oil for 4 minutes. Add onions, cook for 1 more minute. Add broccoli and cook for 2 more minutes. Remove to steam table pan. Keep warm.
Skinless, boneless chicken breasts, cut 2" x 2" Vegetable oil	9 lb	1 cup	18 lb	2 cups	5. Sauté chicken in oil for 3 to 5 minutes until no signs of pink remain. Add chicken to vegetables in steam table pan. Add sauce and mix to coat chicken and vegetables. Heat to serving temperature.

Each step is numbered in sequence and is directly across from the ingredients to which it applies. To facilitate production, closely related steps are grouped together with horizontal lines separating the groups.

The directions *include* instructions on:—

- ▷ mixing speeds and times
- ▷ cooking procedures
- ▷ panning procedures
- ▷ baking times and temperatures
- ▷ portioning directions
- ▷ garnishing and serving instructions

The directions *do not* account for any pre-preparation work that must be done in order to prepare the ingredients for recipe production. However, when scheduling, it is important to account for the pre-preparation phase of production.

While the pre-preparation work may be minimal for some recipes, other recipes may benefit if some of the basic pre-preparation work is completed well in advance of the actual production.

For example, if you complete the pre-preparation work for the French Toast recipe *the day before it is to be served*, you'll get a better quality product in less time. This is stated in Step 4 of the directions for this recipe.

We encourage you to read over the directions provided for each of the recipes carefully *before* you begin production. Use them as you would a road map before starting out on a trip, and keep in mind the following:

In order to obtain the maximum possible quality from each recipe and ensure that the School Lunch Food-Based Menu System Guidelines are met, all of the procedures outlined in this section of the recipe must be followed *precisely*.

For example, when you read the recipe for Chicken Stir-Fry, you will see after Step 3:

"Prepare no more than 50 portions per batch."

This is important because if you prepare more than 50 portions per batch, you will be holding the product too long. It will lose its crispness, color, and nutritional value.

The recipe format also includes a variety of other useful information, such as:

- ▷ portion size
- ▷ the specific contribution of each serving toward the School Lunch Food-Based Menu System Guidelines
- ▷ yield for 50 and 100 servings
- ▷ variations
- ▷ marketing guide for selected items
- ▷ nutrients per serving

You will find this information on the *last page of each recipe*. Most recipes are two pages long; however, some are three or four.

Again using the Chicken Stir-Fry example, let's first look at portion size, contribution to School Lunch Food-Based Menu System Guidelines, and yield. These sections are highlighted on page 17.

SERVING: 1 cup (2 No. 8 scoops)
provides 2 ounces of meat and
 $\frac{5}{8}$ cup of vegetable

YIELD: 50 servings: 23 lb 4 oz
100 servings: 46 lb 8 oz

❖ **Serving:**

The portion size and the suggested portioning tools are listed here.

❖ **Contribution to School Food-Based Menu System:**

This section of the recipe format provides information on the specific contribution of each serving toward the School Lunch Food-Based Menu System Guidelines.

These Guidelines show the requirements by age/grade group for Meat/Meat Alternate, Vegetable/Fruit, and Grains/Breads categories.

In our sample recipe, a 7-ounce portion of Chicken Stir-Fry contributes 2 ounces of *cooked, lean meat* and $\frac{5}{8}$ cup of *vegetables*.

→ **Yield:**

The total recipe yield for both 50 and 100 servings is stated in weight (pounds, ounces). For some recipes, the total yield is also stated by volume (gallons, cups).

➤ **Variations:**

Some of the recipes in the collection include instructions for a variation (or variations) of the basic recipe, and others do not. In our Chicken Stir-Fry example below, two variations are given.

Variations

a. Beef Stir-Fry

50 servings: Follow Steps 1-4. In Step 5, use 10 lb 4 oz of boneless beef top round, cut in $\frac{1}{2}$ " cubes. Saute beef cubes for 2 to 3 minutes, until no signs of pink remain.

100 servings: Follow Steps 1-4. In Step 5, use 20 lb 8 oz of boneless beef top round, cut in $\frac{1}{2}$ " cubes. Saute beef cubes for 2 to 3 minutes, until no signs of pink remain.

b. Pork Stir-Fry

50 servings: Follow Steps 1-4. In Step 5, use 11 lb 9 oz of boneless pork shoulder or loin, cut in $\frac{1}{2}$ " cubes. Saute pork cubes for 3 to 5 minutes, until no signs of pink remain.

100 servings: Follow Steps 1-4. In Step 5, use 23 lb 2 oz of boneless pork shoulder or loin, cut in $\frac{1}{2}$ " cubes. Saute pork cubes for 3 to 5 minutes, until no signs of pink remain.

If a recipe has a variation, follow all of the standard directions in the basic recipe, changing only those specified in the variation instructions.

All of the variations have been tested and standardized using the same procedures outlined in the basic recipe. As a result, you can be sure of product quality and yield.

However, it's important to remember that the School Lunch Food-Based Menu System credit and the Nutrient Analysis provided in the recipe apply to the *basic recipe only*.

→ Marketing Guide for Selected Items

The Marketing Guide for Selected Items provides special purchasing information on foods that will sustain trimming loss during pre-production. These foods are marked with an asterisk (*) in the ingredients column of the recipe format.

In the Chicken Stir-Fry example below, you'll see information given for three ingredients. Turning back to page 14, you'll see each of these has an asterisk preceding it.

Marketing Guide for Selected Items

Food as Purchased	For 50-Serving Recipe	For 100-Serving Recipe	For ____-Serving Recipe
Broccoli	6 lb 15 oz	13 lb 14 oz
Carrots	8 lb 1 oz	16 lb 2 oz
Onions	1 lb 7 oz	2 lb 14 oz

What you need to know:

For items marked with an asterisk, the quantity listed under "Weight" and "Measure" in the recipe is the EP (Edible Portion). This is the quantity required for production and therefore does not account for trimming loss.

The Marketing Guide shows the AP (As Purchased) quantity required when ordering. In our example, 6 pounds 15 ounces of broccoli must be *purchased* (AP) in order to yield 5 pounds 10 ounces (EP), the amount required to produce 50 portions of Chicken Stir-Fry.

❖ Nutrients Per Serving

As you can see in the Chicken Stir-Fry example below, this section of the recipe format provides information on 12 nutrients.

Nutrients Per Serving

Calories	208	Saturated Fat	1.4 g	Iron	1.5 mg
Protein	22 g	Cholesterol	47 mg	Calcium	51 mg
Carbohydrate	12 g	Vitamin A	1355 RE/13640 IU	Sodium	251 mg
Total Fat	8.1 g	Vitamin C	46 mg	Dietary Fiber	3 g

The nutrients shown on each recipe are:

calories	vitamin A
protein	vitamin C
carbohydrate	iron
total fat	calcium
saturated fat	sodium
cholesterol	dietary fiber

All of the recipes in this collection were analyzed for their nutritive value. For a more detailed explanation of the nutrient analysis of these recipes, see page 34 of this manual.

For information on the steps taken to reduce the amount of fat in these new recipes, see page 36.

Three nutrients — fat, saturated fat, and iron — have been calculated to the tenth of a unit. All others have been rounded to the nearest whole unit. When the level of one of these nutrients is .4 or less, it is shown as 0.

◆ **Special Tips:**

Some of the recipes include Special Tips. On the Chicken Stir-Fry, for example, you'll find the following:

Special Tips:

- 1) For an authentic Oriental flavor, substitute 1/4 cup of sesame oil for 1/4 cup of vegetable oil to saute chicken, for each 50 servings.
- 2) Fresh vegetable mixes can be varied to include combinations of bean sprouts, broccoli, cabbage, celery, Chinese pea pods, onions, peppers, and water chestnuts.

Here's another example, this one from the recipe for Chicken Fajitas:

Special Tips:

- 1) If a grill is not available, a steam-jacketed kettle may be used to saute the chicken.
- 2) Lowfat sour cream (1 Tbsp per serving) and salsa (2 Tbsp per serving) make excellent garnishes.
- 3) This makes an attractive lunch plate when served with Refried Beans (I-15).

As you can see from these examples, the Special Tips offer information that can help you in a variety of ways. Some, like the first Special Tip in the Chicken Stir-Fry, offer advice on increasing the authenticity of the recipe. Others may:

- ▷ offer ways to make production easier
- ▷ suggest optimal methods for storage
- ▷ provide alternative serving suggestions
- ▷ suggest appropriate garnishes

ADJUSTING RECIPE YIELDS

Each recipe lists the quantities you will need to produce 50 and 100 servings. However, to meet your specific needs, you may need to adjust the number of servings. To help you do this, the recipe format includes a column entitled "For _____ Servings." This column is highlighted in the example below.

Stir-Fry (Chicken, Beef, Pork)

Meat • Vegetable

Main Dishes D-39

Ingredients	50 Servings		100 Servings		For Servings	Directions
	Weight	Measure	Weight	Measure		
Low-sodium soy sauce		1 cup		2 cups		1. Dissolve cornstarch in soy sauce. Add spices.
Cornstarch.....	4 oz	3/4 cup 2 Tbsp	8 oz	1 1/4 cups		
Ground ginger		1/2 tsp		1 tsp		
Granulated garlic		3 Tbsp		6 Tbsp		
White pepper		2 tsp		1 Tbsp 1 tsp		
Low-sodium chicken stock, non-MSG		2 qt		1 gal		2. Heat chicken stock to a boil and slowly stir in cornstarch mixture. Return to a simmer.
						3. Cook for 3 to 5 minutes, until thickened. Remove from heat.
Fresh mixed vegetables: •Fresh broccoli, chopped.....	5 lb 10 oz	2 gal	11 lb 4 oz	4 gal		Prepare no more than 50 portions per batch.
•Fresh carrots, peeled. 1/4" slices	5 lb 10 oz	1 gal 2 cups	11 lb 4 oz	2 gal 1 qt		
•Onions, diced	1 lb 4 oz	1 qt	2 lb 8 oz	2 qt		
OR						
+Frozen mixed Oriental vegetables	12 lb 8 oz	3 gal 2 qt	25 lb			4. Sauté sliced carrots in oil for 4 minutes. Add onions, cook for 1 more minute. Add broccoli and cook for 2 more minutes. Remove to steam table pan. Keep warm.
Vegetable oil		1/2 cup		1 cup		
Skinless, boneless chicken breasts, cut 2" x 2"	9 lb	1 cup	18 lb	2 cups		5. Sauté chicken in oil for 3 to 5 minutes until no signs of pink remain. Add chicken to vegetables in steam table pan. Add sauce and mix to coat chicken and vegetables. Heat to serving temperature.
Vegetable oil						

How will you use this column?

Using a worksheet similar to the one on page 23, you'll first determine the new quantities you will need. Then you'll write in the new amounts in the spaces provided in the "For _____ Servings" column.

Let's convert an actual recipe from the new collection.

We'll begin by describing the proper method to use. Then we'll go through each step in two examples, using the recipe for Breakfast Burrito with Salsa. In one example, we'll *reduce* the recipe yield. In the other, we'll *increase* it.

► **To adjust the yield of a USDA standardized recipe, use the following method:**

Step 1: Determine the total yield of the original recipe.

To do this, multiply the original number of portions by the original portion size.

$$\frac{\text{original number of portions}}{\text{original portion size}} \times = \frac{\text{original yield}}$$

Step 2: Determine the total new yield. Multiply the total number of portions you want by the desired portion size.

$$\frac{\text{desired number of portions}}{\text{desired portion size}} \times = \frac{\text{total new yield}}$$

Step 3: Determine the "multiplying factor." Divide the total new yield by the original yield.

$$\frac{\text{new yield}}{\text{original yield}} \div = \frac{\text{multiplying factor}}$$

Step 4: Determine the new quantity of each ingredient. Multiply each ingredient by the multiplying factor.

$$\frac{\text{multiplying factor}}{\text{original quantity (of each ingredient)}} \times = \frac{\text{new quantity}}$$

Place the new quantity for each ingredient in the appropriate space in the "For _____ Servings" column.

◇ Now let's convert a recipe from the new collection in these two examples:

Example 1: Reducing a Standardized Recipe

Using the recipe for Breakfast Burrito with Salsa, we're going to *reduce* the yield from 50 to 40 servings. The individual portion size will remain 3 ounces.

In the following calculation, we use lowfat milk as a sample ingredient. The original recipe calls for 6 ounces of lowfat milk for 50 servings.

1. What is the total yield of the original recipe?

$$\frac{50}{\text{original number of portions}} \times \frac{3 \text{ oz}}{\text{original portion size}} = \frac{150 \text{ oz}}{\text{original yield}}$$

2. What is the total new yield?

$$\frac{40}{\text{desired number of portions}} \times \frac{3 \text{ oz}}{\text{desired portion size}} = \frac{120 \text{ oz}}{\text{total new yield}}$$

3. What is the multiplying factor?

$$\frac{120 \text{ oz}}{\text{total new yield}} \div \frac{150 \text{ oz}}{\text{original yield}} = \frac{0.80}{\text{multiplying factor}}$$

4. What is the quantity needed for 40 servings?

$$\frac{0.80}{\text{multiplying factor}} \times \frac{6 \text{ oz lowfat milk}}{\text{original quantity}} = \frac{4.8 \text{ oz}}{\text{new quantity}}$$

Place 4.8 oz on the line opposite lowfat milk in the "For _____ Servings" column.

Example 2: Increasing a Standardized Recipe

Now let's *increase* the recipe yield from 50 to 75 servings.

Portion size will remain 3 ounces. And we'll once again use lowfat milk as a sample ingredient.

1. What is the total yield of the original recipe?

$$\begin{array}{r} 50 \\ \hline \text{original number} \\ \text{portions} \end{array} \times \begin{array}{r} 3 \text{ oz} \\ \hline \text{original} \\ \text{portion size} \end{array} = \begin{array}{r} 150 \text{ oz} \\ \hline \text{original yield} \end{array}$$

2. What is the total new yield?

$$\begin{array}{r} 75 \\ \hline \text{desired number} \\ \text{of portions} \end{array} \times \begin{array}{r} 3 \text{ oz} \\ \hline \text{desired portion} \\ \text{size} \end{array} = \begin{array}{r} 225 \text{ oz} \\ \hline \text{new yield} \end{array}$$

3. What is the multiplying factor?

$$\begin{array}{r} 225 \text{ oz} \\ \hline \text{total new yield} \end{array} \div \begin{array}{r} 150 \text{ oz} \\ \hline \text{original yield} \end{array} = \begin{array}{r} 1.5 \\ \hline \text{multiplying} \\ \text{factor} \end{array}$$

4. What is the quantity of lowfat milk needed for 75 servings?

$$\begin{array}{r} 1.5 \\ \hline \text{multiplying} \\ \text{factor} \end{array} \times \begin{array}{r} 6 \text{ oz} \\ \hline \text{original quantity} \end{array} = \begin{array}{r} 9 \text{ oz} \\ \hline \text{new quantity} \end{array}$$

Place 9 oz on the line opposite lowfat milk in the "For _____ Servings" column.

(On page 31, you'll find a blank recipe conversion sheet to use in converting other USDA recipes.)

NOTES

Here's a blank page for calculations:

Recipe Conversion Worksheet

◆ **A note about working with non-standardized recipes:**

As we've already seen, the total yield of each of the recipes in this packet has already been calculated and is indicated on the recipe card. However, there may be times when you want to use this same method to adjust the yield of recipes that are not standardized. In these instances, you may need to do some extra calculations.

For example, in working with non-standardized recipes, it's a good idea to confirm the total yield of the recipe by adding the quantities of all ingredients used.

In addition, you may need to convert all of the quantities to ounces before you can calculate the total yield. For your convenience, this training manual includes a chart with basic units of measure and their equivalencies on page 39.

More Information on The Nutrient Analysis

Thanks to the nutrient analysis, you can see at a glance what an individual serving of each recipe provides in terms of the following 12 nutrients:

calories	vitamin A
protein	vitamin C
carbohydrate	iron
total fat	calcium
saturated fat	sodium
cholesterol	dietary fiber

The nutrient analysis was done by computer, using the Agricultural Research Service's nutrient analysis software and:

- ▷ the most recent edition of USDA Handbook 8
- ▷ the Composition of Foods Database and
- ▷ the National Nutrient Data Base for Child Nutrition Programs

This information can help you plan balanced, nutritious meals. For example, if you decide to serve Chicken Stir-Fry:

You may wish to select an item higher in iron to serve as a second choice since one serving of the Stir-Fry contains only 1.5 mg of iron.

And, since the vitamin A content of the Chicken Stir-Fry is high, you may decide to offer a fruit dish that's high in vitamin C for dessert.

Here's some additional background on the nutrient analysis that may be helpful as you work with the recipes:

- ▷ Each recipe was analyzed for its nutritive value using *primary ingredients only*. Alternative and optional ingredients were not included.
- ▷ The type and quantity of each primary ingredient was entered into the nutrient analysis software program based on the *market form* or purchase state given in the recipe — for example, fresh, frozen, or canned.
- ▷ Adjustments for yield, nutrient retention, and moisture/fat changes were also calculated. As a result, the final nutrient analysis of the recipe reflects the final "cooked or prepared" product.

To illustrate this process, let's look at some of the steps involved in doing the nutrient analysis for the Chicken Stir-Fry recipe, using carrots as an example.

Since the recipe calls for "fresh carrots" as a primary ingredient, the food code selected from the USDA Handbook 8 — and entered into the computer — was "Carrots, raw."

The quantity for "fresh carrots, peeled" (as stated on the recipe card) was also entered.

Next, a nutrient retention factor for "stir-fried vegetable" (based on ARS data) was entered to reflect nutrient changes during the cooking process.

Finally, any moisture and/or fat loss (or gain) that would occur during cooking was entered to calculate the final recipe weight and nutrient analysis.

THE NEW RECIPES REDUCE FAT WITHOUT LOSING FLAVOR

As you work with these new recipes, you'll find that they use reduced levels of fat. This is one important way the recipes are consistent with the Dietary Guidelines. The recipes successfully minimize fat without losing flavor because of careful attention given to both:

- ▷ ingredients
- ▷ and cooking techniques

In developing and testing the recipes, USDA made sure the ingredients were purchased in a lowfat form, provided the overall quality of the product was not affected. For example:

- ▷ All raw meat ingredients were specified to be lowfat. The ground beef, for instance, had no more than 24 percent fat. Where possible, it was cooked prior to being added to the product so the fat could be drained.
- ▷ Chicken was either purchased skinless or the skin was removed prior to cooking.
- ▷ Mayonnaise and dairy products, such as milk, yogurt, and cheese, were purchased in the lowfat form provided this did not lessen the final quality.

In addition, main entrees were prepared with a minimal amount of fat. For example:

- ▷ No products were fried.
- ▷ All sauteed items were prepared with a small amount of oil.

Baked goods were also specially prepared. For example:

- ▷ The amount of margarine or butter was reduced by substituting lowfat yogurt and applesauce for a percentage of the fat.
- ▷ Whole eggs were replaced with egg whites.
- ▷ Baking pans were either ungreased or lightly sprayed with vegetable oil.

You can use these same techniques to reduce fat without losing flavor in the recipes you already have.

SOME TIPS ON MODIFYING AND STANDARDIZING RECIPES

Any recipe can be modified to reflect new tastes or changing needs. The recipes in this collection may give you ideas for modifying the recipes you're already using — by adding or substituting new ingredients, for example, and changing your cooking techniques.

As you make changes, it's important to modify first, then standardize.

Standardized recipes have many advantages:

A standardized recipe is one that has been tried, adapted, and retried several times for use by a given foodservice operation and has been found to:

- ▷ produce the same good results and yield every time when the exact procedures are used with the same type of equipment and the same quantity and quality of ingredients.

Using a standardized recipe ensures that:

- ▷ the same amount of product is produced each time
- ▷ the same portion size is provided each time

Menu planning can be more consistent because:

- ▷ there is a predictable yield
- ▷ costs are easier to control
- ▷ inventory is easier to control

In addition, when the same good results can be produced time after time:

- ▷ foodservice workers have more confidence in what they are doing and need less supervision
- ▷ and managers can be sure the nutrient analysis of a recipe will be accurate as long as ingredients and preparation methods remain the same

When you decide to modify a recipe, start by making 25 portions. In addition:

- › Change *only one ingredient* at a time. Keep other ingredients the same as in the original recipe.
- › Record clear descriptions of foods substituted in exact amounts.
- › If increasing or decreasing an ingredient, do so in increments of 1/4 to 1/2 of the amount called for in the original recipe.
- › Follow preparation instructions closely and record any changes you may make.
- › Do not make further changes or a larger size recipe until the first modification has produced a high-quality product.

Once you have successfully prepared 25 portions of a recipe you are modifying:

- › Set up taste panels to evaluate the product for appearance, consistency, texture, flavor, and overall acceptability.
- › Reproduce at 50 and 100 servings before increasing the recipe to the number needed for your meal service.
- › Instruct foodservice personnel about how and why recipes have been modified.

It's important to also:

- › Weigh the total volume of recipes at 50 and 100 servings and record the weight.
- › Weigh each serving and record the weight.

The weight of the total recipe and the weight of each serving are important for nutrient analysis.

Picture This In Your School

As a school food service professional, your job is important. You're essential to providing kids with the nutrition that helps them to grow and learn.

And we'd like to help you do just that. So we came up with an exciting group of recipes that will make your job easier and even more rewarding!

These new recipes are:

- **Simple** – Most recipes use a simplified list of ingredients and fewer steps for preparation.
- **Nutritious** – You'll find a lower fat content and moderate use of added salt.
- **Easy to implement** – Each recipe features ingredients that are easy to obtain. Plus, we've added special tips so you can tailor the recipes to fit the tastes of students in your school.

We've Made Nutrition Easy For You

This recipe collection has been developed with today's kids and their tastes in mind. Ethnic foods, meatless dishes, and even low-fat desserts made with fresh ingredients are just a few of the ways you can appeal to the changing tastes of your young customers.

Each dish in this recipe collection contributes substantially to the nutritional goals of the school meal programs.

You'll find the nutritional content per serving listed on each recipe card. You may wish to post these in your lunch line.

Thick Vegetable Soup

Chicken Fajita

BEST COPY AVAILABLE

Too much of "what's new" at one time can be overwhelming.

- Show only one new item at a time, 2 or 3 in 1 month is plenty!

- Market with pizzazz! Try using announcements over the loud-speaker and put up signs. Do this several days in advance – and several times for emphasis.
- Give out samples at the entrance to, or on, the serving line.

- If it's an ethnic food you're presenting, build an ethnic menu around it. You can even wear costumes to "dress" the part.
- Have tasting parties and let the kids sample new items in advance. And use that feedback!

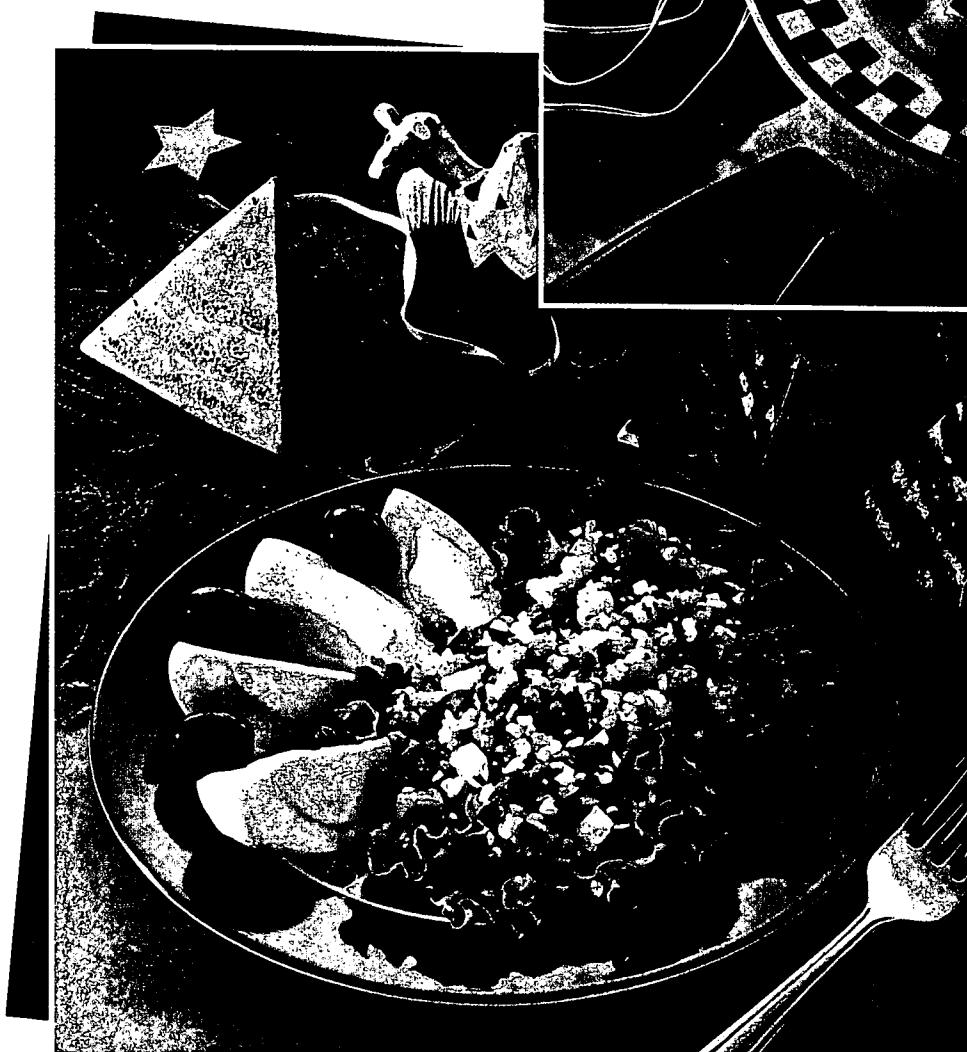

Beef Stir-Fry

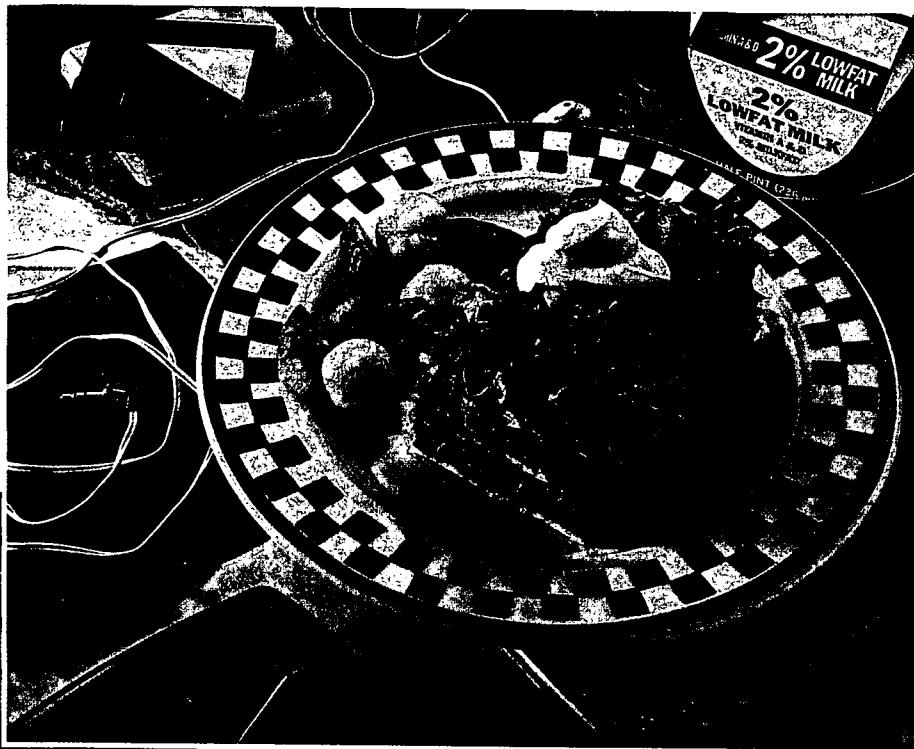

Garnishing Suggestions

Whether you're garnishing pans for the steam table or decorating an individual plate for display, garnishes can help add eye appeal to your presentation.

Use your imagination when you set up and garnish. Here are some tips to help you. All are simple, quick, and inexpensive, but can make such a difference!

Tabouleh

Beef Taco Pie

Get their attention with a display plate!
Everyone knows you don't have time to garnish every individual serving. But how about sparking kids' interest with a sample plate you put out for display?

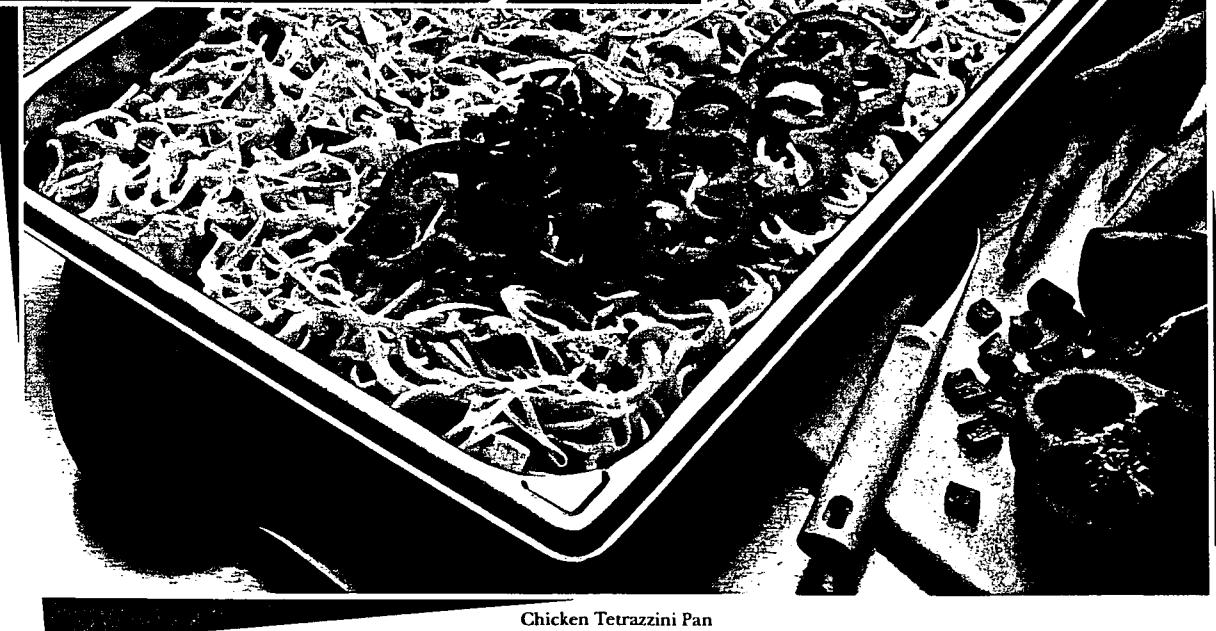

Think theme – For example, use tortilla chips to accent a lunch with a Southwestern flavor.

Think color – Orange wedges on a pan of oatmeal say, "Good Morning!"

Think accent – Lemon slices, sprinkled with parsley flakes, enliven a pan of baked fish. So does paprika dashed on steaming mashed potatoes.

Breakfast Burrito

Chicken Tetrazzini Pan

Think contrast — Picture croutons on stewed tomatoes for an inviting winter lunch... and grapes, red-skinned apple slices, or fresh berries on chilled vanilla pudding — anytime.

Think big — Whenever you're garnishing, choose big garnishes to make a statement. Thick broccoli spears or leafy kale can really dress up your presentation. For something different, try a slice of pineapple on parsley or endive sprigs to spruce up a tray of luncheon meats or tuna salad.

For more ideas, consult your "Quantity Recipes for School Food Service" (USDA publication #PA 1371) Section A, page 21.

South-Of-The-Border Sensation

Spicy foods and Mexican restaurants are popular choices for kids and adults alike. Now you can take advantage of this trend, too!

Serve up healthy Mexican, Tex-Mex, Caribbean, or Central American foods and create a real sensation. To promote the dishes, and the fun of joining in the fiesta, make your cafeteria come alive with the use of our recommended promotional items (see pages 12-15). You can also use these basic props:

- **Chili Peppers** – Easy to draw or make, these colorful red and green peppers can be used on posters, banners, table tents, and serving bars.
- **Sombreros** – Inexpensive, these traditional hats immediately signal Mexican food and fun. Hang them on the walls and ceiling or even ask your lunchroom staff to wear them.
- **Piñatas** – A colorful way to add excitement to your special Mexican theme days. Plus, they can be used again and again.

And don't stop there! If you or any of your staff have ideas, go for it. Your enthusiasm is sure to inspire and excite the students at your school.

Create A Far East Feast

Special thanks to Hopkins High School

Based on crunchy vegetables, tasty sauces, and lean cuts of meat, Asian food is a favorite at restaurants and at home. Make the most of this popularity by serving delicious, nutritious Asian food in your cafeteria. (It's easy to make, too!)

To boost the popularity of these dishes, transform your cafeteria into an exotic, exciting place. Simply use some of our recommended promotional items (pages 12-15) and a few basic props:

- **Chopsticks** – Inexpensive to buy, chopsticks can be a real crowd-pleaser. Recruit some experienced students or teachers to help others with their chopsticks. Getting everyone involved in the fun activities is a great way to build interest in your program.
 - **Traditional Costumes** – Borrow or rent a costume that comes from an Asian land. Japan, China, Thailand, and Vietnam all have beautiful native clothing.
 - **Music** – Free from the library, music can set the stage for your special Asian food day. Play it in the cafeteria while students are eating or use some over the school's loudspeaker to announce the upcoming festivities.
- And that's just the beginning. Ask your staff and the teachers at your school if they have any ideas. Input from everyone for a project like this will make it a sure-fire success!

Use Your Imagination

You know your school and your customers. You're the expert on school meals in your community!

Here are some questions to help you get started. They're designed to help you tailor promotional efforts to your school.

- Does your community or region grow certain foods or is your region known for certain foods? Use them to inspire your decorations or meal choices. For example: If your school is surrounded by farms and rural areas, you might organize a day when all the food served reflects the local crops.
- What are your school colors? Can they be used in your cafeteria? For example: If your school colors are blue and white, you could serve blue corn and white corn tortilla chips with a Mexican-inspired meal.
- What's the school's mascot? If your school has a costumed character, such as a bulldog, you might use it to hand out fliers announcing a new dish in the cafeteria.
- Is there a significant event happening at the school or in your community? For example: When the local professional or semi-pro sports team is on a winning streak

Brownie

or in the playoffs, use its team colors or team name in your cafeteria to generate some excitement.

Get The Whole School Involved!

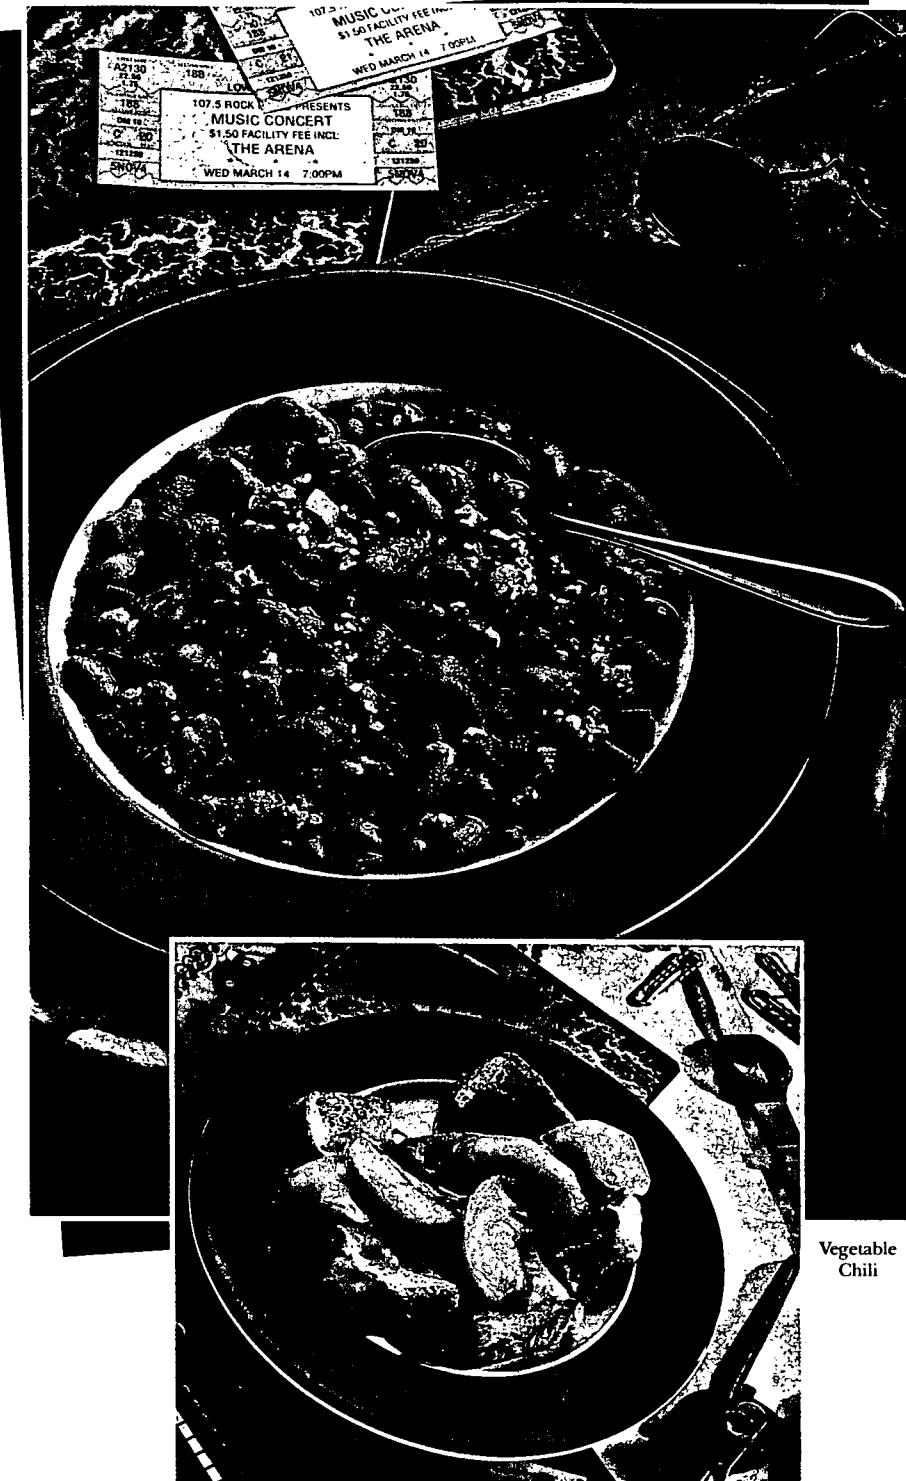

Remember, these questions are just a few ways to get your creative juices flowing. Use your imagination and ideas from your staff or the teachers at your school to make your cafeteria the "in place" to be.

1. Contact the teachers in language classes or the sponsors of language/ethnic clubs. They can help you with a theme day and perhaps lend you props to decorate your cafeteria.
2. Use the public address system in your school. Free and easy, this is a great way to reach students early in the day as they decide what to do for lunch.
3. Ask the band director or choral director to add music to your theme day. It can be part of their teaching plan, and the sound of music will draw more kids into your cafeteria.
4. Ask parent volunteer groups to help out with promotions in the lunchroom. They're a great resource for ideas, too.
5. And that's just the tip of the iceberg. Each new idea will lead to another. And each different way you can present lunch at your cafeteria will add to the nutrition your students will receive.

Good Luck! Have Fun!

Increase Cafeteria Activity With These Exciting Promotional Items

Why should the fast-food restaurants have all the fun?

Borrow some ideas from them and soon you'll see more students in your school cafeteria.

These promotional items can help you get started promoting new dishes, theme days, school activities and, of course, the fun of eating lunch at school.

Kiosk

Easy to build, this colorful, illuminated three-sided kiosk can be a colorful addition to your cafeteria. Just take another look at pages 8 and 9!

Use it to: Direct traffic around food bars, announce upcoming cafeteria or school events, or showcase a new dish by placing the kiosk in the main school entryway where kids come and go. Plexiglass "windows" let you change pictures and messages as often as you want.

How to: Woodworking directions are included with this package. The kiosk is a project that could be done in the school's wood shop class or contracted out to a woodworking professional.

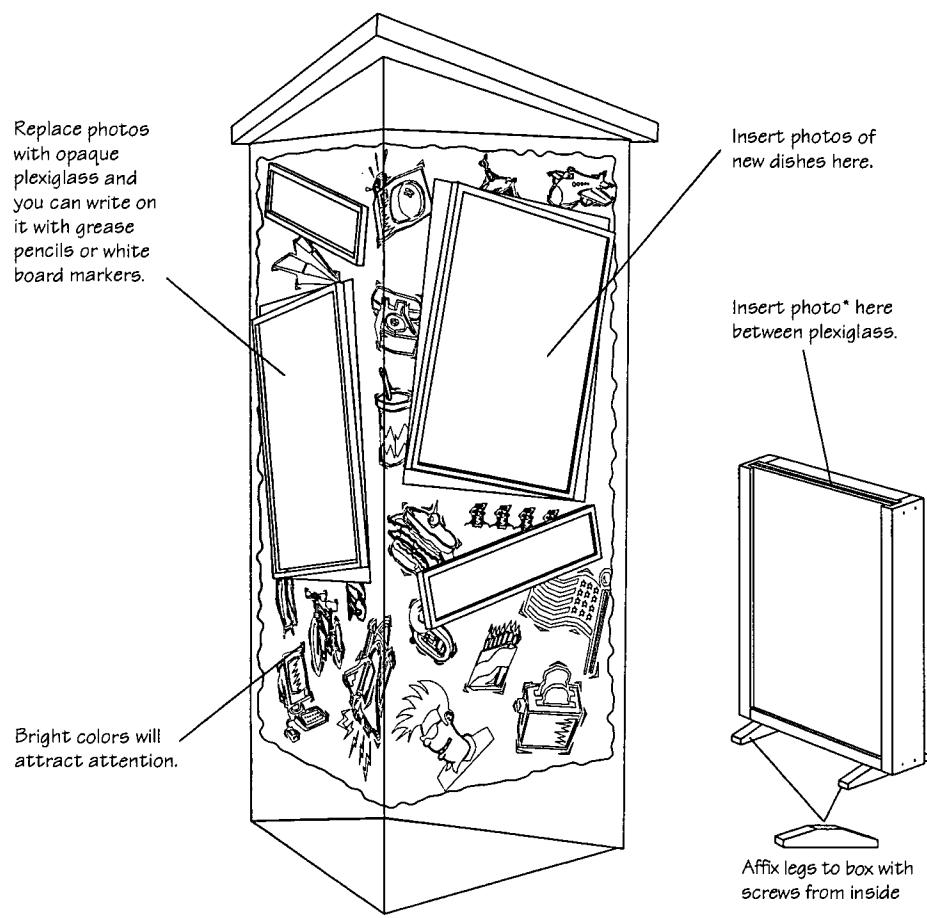

Photo Box

1. Cut 4 pieces of $\frac{3}{4}$ " AC plywood making 2 of them $3'' \times 20\frac{1}{2}''$ for the sides, 1 piece $3'' \times 15''$ for the bottom, and 1 piece $2\frac{3}{8}'' \times 15''$ for the top.

2. On the 3 longer pieces for the sides and bottom, cut a $\frac{5}{16}$ " wide, $\frac{5}{16}$ " deep dado $\frac{1}{4}$ " in from face edge. The photo*, sandwiched in between 2 pieces of plexiglass,

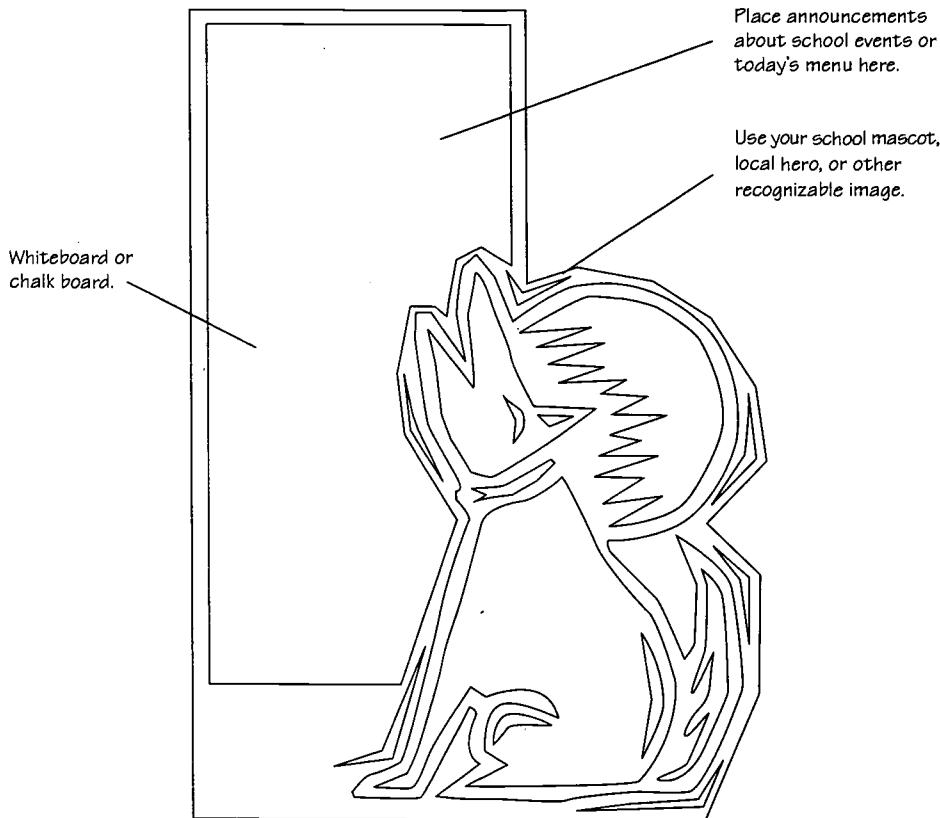

will slide into this joint from the top of the finished box.

3. Assemble the 4 pieces of the Photo Box using $1\frac{1}{2}" - 4^d$ finish nails and wood glue. The dadoed grooves must line up on the sides and the bottom. Assemble the top piece flush to the back. This will allow the photo panel to slide into the groove from the top.

* Substitute a transparency for the photograph and illuminate if desired.

BEST COPY AVAILABLE

Free-Standing Whiteboard

4. Cut 2 pieces of $\frac{3}{4}$ " AC plywood $1\frac{1}{2}" \times 9"$. Measure in 3" from each end of both pieces, then measure $\frac{3}{4}"$ from the top edge. Draw a line between the two points. Trim on this line. This tapers the top edge of the legs.
5. Attach the legs to the Photo Box from the inside using wood screws. Pre-drill all holes first.

6. Sand box and paint desired color.
7. Cut 2 pieces of $\frac{1}{8}$ " clear plexiglass $15\frac{3}{8}" \times 20"$. Trim photo* to the same size. Sandwich photo* between the 2 pieces of plexiglass. Tape edges with transparent tape.
8. Slide plexiglass and photo* into the top of the Photo Box.

1. On a $\frac{3}{4}" \times 4' \times 4'$ AC plywood handy-panel, lay out your desired graphic image and menu-board area. Be sure to leave a 2" frame around the menu board in order to provide proper support for the whiteboard panel.

2. Cut along your layout lines using a jig saw. To make the interior cut-out for the whiteboard panel, drill a $\frac{3}{8}$ " hole inside each corner of the cut-out area. Start your jig saw in one of the holes and cut along the layout line to the next hole.
3. Use a router to shape the edges on menu board and to cut a $\frac{3}{8}" \times \frac{1}{4}"$ rabbet joint around the back of the whiteboard opening. This will provide a recessed area for the whiteboard panel.

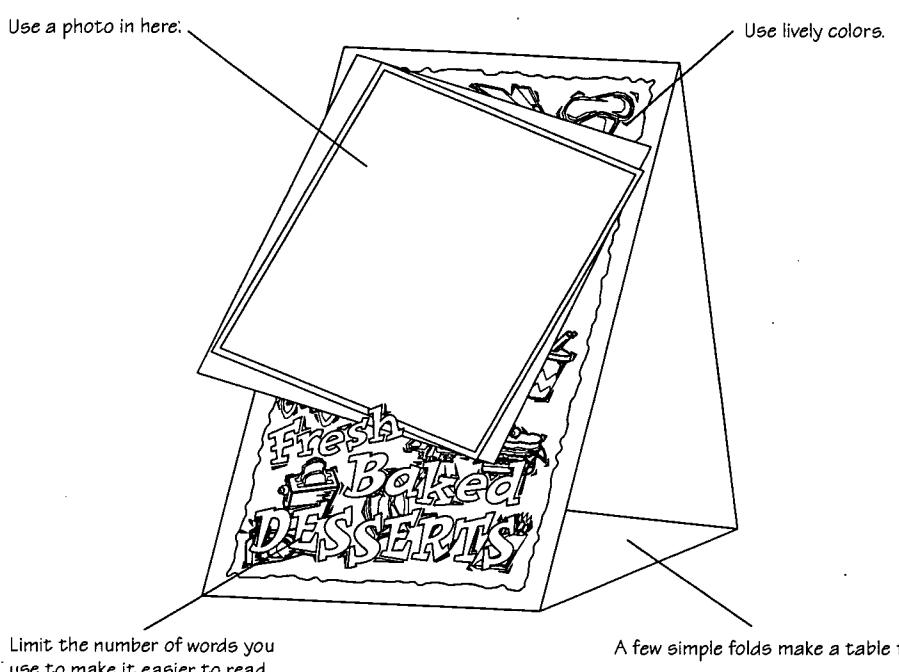

4. Sand the entire menu board, then paint and decorate the menu board according to your school colors or other preferences.
5. Cut a piece of $\frac{1}{4}$ " thick whiteboard to fit into the back of the menu board. Use flush mount retainers to hold the whiteboard panel in place. Depending on your specific mounting preference, mount either an easel stand or wall hanging brackets to the back of the finished menu board.

Table Tents

Great for announcing next week's meals or this week's specials, these are an inexpensive way to reach students and the school's staff.

Use them to: Decorate cafeteria tables, spread the news about lunch or breakfast in other areas of the school (like the library), or announce a special school activity.

How to: Look at table tents in other restaurants to get ideas. These could be done at a local instant printing shop or as part of a school or art class activity. Then just fold them and place them on your tables.

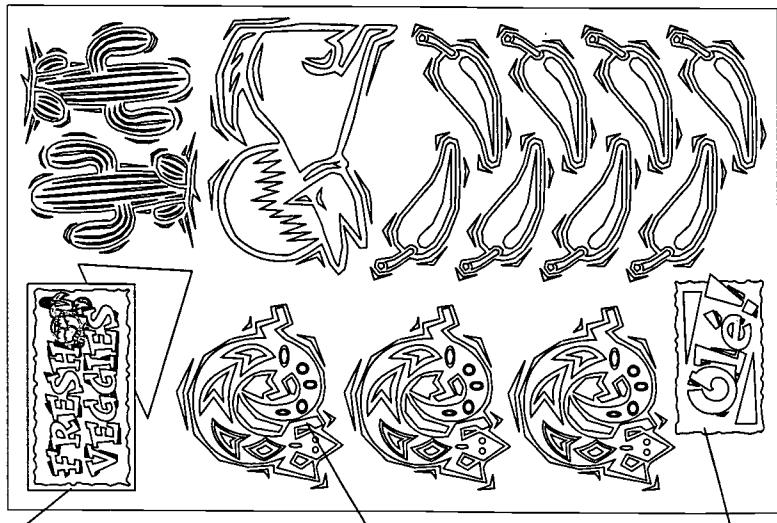

Static-Cling Decorations

Colorful and fun, these decorations can add a burst of excitement around the protective glass of your main serving line or salad bar.

Use them to: Decorate your cafeteria, add color, or create a mood for your theme day or ethnic food day.

How to: Order these from a local shop specializing in screen printing. (They shouldn't cost too much.) Or have someone in your school's computer center produce a color printout on acetate.

Help Kids Make Healthy Eating Fun!

Capturing children's attention and helping them understand good nutrition is a challenging task. That's why USDA's Team Nutrition has made special arrangements with Disney's Buena Vista Pictures Distribution, Inc. to enlist the services of two very famous characters from "The Lion King" as our "spokestoons."

"Pumbaa," a good-hearted warthog, and "Timon," a wisecracking meercat, both enormously popular characters with children, will provide you with special help to motivate children to make healthful food choices.

A number of public service announcements have already been taped using these well-liked characters giving children tips for healthful eating. And promotional materials featuring "Pumbaa" and "Timon" will soon be available for your cafeteria.

In the cafeteria, these "spokestoons" will deliver an easy-to-understand message about good eating habits and smart food choices. Colorful and lively, the materials will entertain children as well as inform them. It's a terrific way to get kids involved from the start.

In addition, the cafeteria materials will complement and reinforce what kids are learning in the classroom through Team Nutrition's classroom teaching kits.

Banners

Perfect for the wide side of a salad bar, banners help add color and excitement to your cafeteria setting. Plus, they're inexpensive to do!

Choose just a few words so they can be read from a distance.

Don't be afraid to use lots of color.

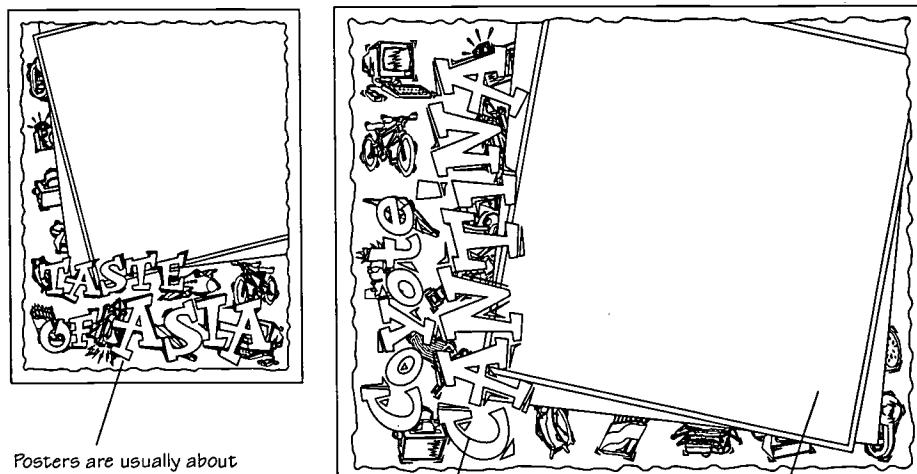

Tie in your graphics with your theme.

Use them to: Set a theme for an ethnic food day, introduce a new dish to the cafeteria menu, or announce an upcoming school activity.

How to: Making a banner can be as easy as using a length of white or colored paper, newsprint paper, or any other large roll of paper. The banner may be made by school art classes or ordered at any local print shop or sign company.

Posters/Hang Cards

Hang these in the cafeteria and in other areas of the school to start the students talking about the tasty food being served in the cafeteria.

Posters are usually about 22" wide by 28" tall.

Make sure your words are large enough to read from a distance.

Use big graphics and photos so they can be seen from across a room.

Use them to: Tell students about a theme day coming to the cafeteria, introduce a new entree, side dish or dessert, or announce an upcoming school activity like a pep rally, big game, prom, or graduation.

How to: Posters can be done by the students at your school or by folks at an instant copy shop or print shop. Bright colors and pictures will improve the effectiveness of your posters. For a dramatic look, use enlarged photos.

"HEY! Turn the page to see what else is new."

The United States Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, and marital or familial status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact the USDA Office of Communications at (202) 720-5881 (voice) or (202) 720-7808 (TDD).

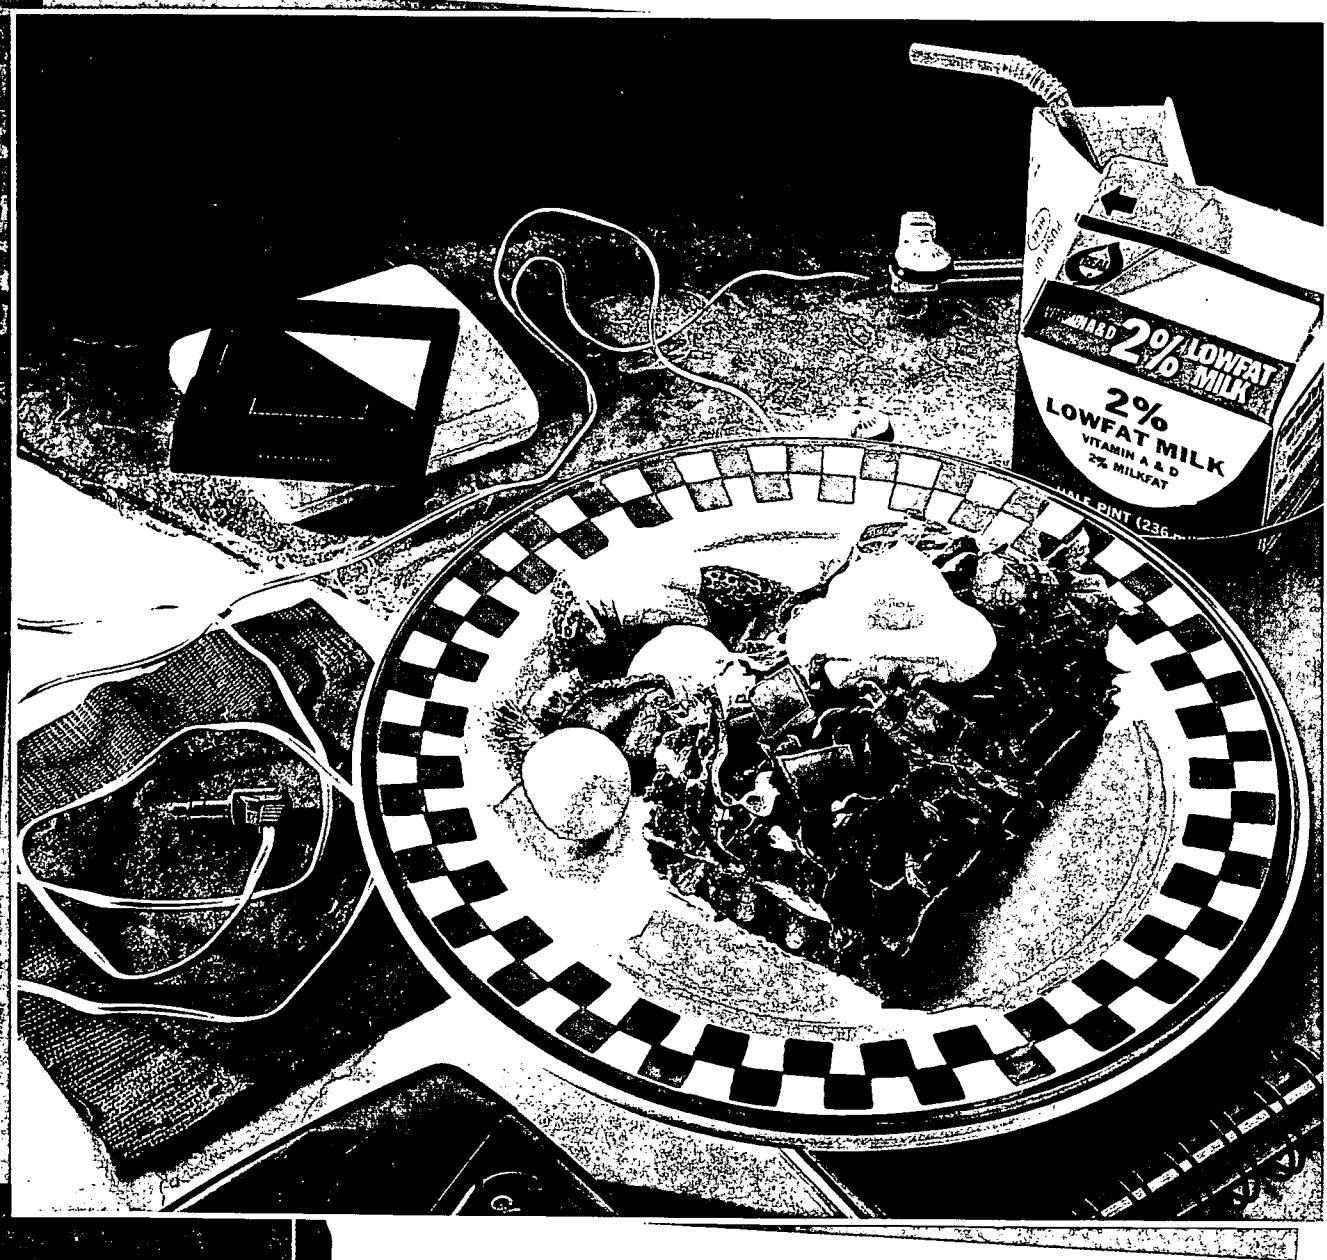

To file a complaint, write the Secretary of Agriculture, U.S. Department of Agriculture, Washington D.C. 20250; or call (202) 720-7327 (voice) or (202) 720-1127 (TDD). USDA is an equal employment opportunity employer.

In Your School!

**USDA's New School Lunch
and Breakfast Recipes...
A Tool Kit for Healthy School Meals!**

That's why we've included these picture pages with 24 of the new school lunch and breakfast recipes.

The pictures are for you and your staff... so you can see at a glance what exciting new entrees and side dishes you can prepare with the recipes. You can use them for staff training, menu planning, and to get merchandising ideas, such as ways to garnish a sample display plate to present at the start of the serving line or on a special table strategically placed outside the cafeteria.

The pictures are for the kids, too... You'll find the pages are easy to copy, so you can display them in plexiglass frames on the serving counter or, enlarged, in frames on the wall. The kids can see what's for lunch today...or, looking ahead, for tomorrow! You may also want to display the nutrition information that comes with each recipe. Show kids why they're making a healthy choice!

If you'd like to obtain the original transparencies for other uses... Contact your state agency. We'll be giving a set of these 24 slides to each state, and you may be able to borrow them. If you prefer, you can purchase copies from USDA's Photography Center. You can take these slides to a local photography shop for enlargements. The strong color in the slides holds up—even in photos as large as 16 x 20 inches. Posters or light boards made from the transparencies will really get kids' attention!

A picture is worth a thousand words.

For more information on how to purchase the slides from USDA, write or call:

Promotional Kiosk

A Step-By-Step How-To Guide

Materials And Tools Needed To Build The Promotional Kiosk

- 2 - $\frac{1}{2}$ "x4"x8' sheets
AC plywood
- 3 - 1"x2"x12' pine boards
- 1 - 1"x4"x2' pine board
- 1 - 48" continuous hinge
- 1 - slide latch
- 1 - $\frac{1}{8}$ "x20"x60" clear plexiglass
- 1 - $\frac{1}{4}$ "x20"x60" white plexiglass
- 1 lb. $1\frac{1}{8}$ " finish nails
- 1 qt. wood glue
- 1 qt. white latex enamel paint
- 3 - nylon floor glides
- 2 - fluorescent light fixtures
with bulbs & cord
- 80-grit, 100-grit, and
150-grit sandpaper
- Table saw
- Hand saw
- Circular saw
- Miter saw
- Router with bits
- Hammer
- Screwdriver
- Handscrew clamps

Build The Promotional Kiosk For Less Than \$250

Total Construction Takes Just 20 Hours

PROMOTIONAL KIOSK

Step-By-Step Instructions

Side Panels

- 1 Cross-cut a 4' x 8' sheet of $\frac{1}{2}$ "-thick plywood to 66" with a circular saw or panel saw.
- 2 Set the rip fence on your table saw at 24", and cut the side panels (A) by ripping the 66"-long sheet of plywood in half.
- 3 Set the blade on the saw to the proper angle to cut a 50° bevel (see *Detail 1*). Set the fence so the cut leaves a $23\frac{7}{8}$ "-wide workpiece (test on scrap wood to find the exact distance). Miter the joining edges of the side panels. Place the factory edge against the fence, with the smooth side of the plywood down when cutting the angle; this will position the smooth side out during assembly.
- 4 Set the blade on the saw to the proper angle to cut a 40° bevel (see *Detail 2*). Set the fence so the cut leaves a $23\frac{1}{2}$ "-wide workpiece. Place one side panel smooth-side-down, and cut off the factory edge on the panel. Repeat for other side panel.
- 5 Measure along the outside edge of each side panel and place a mark at 60". Using a straightedge, draw a line from the mark to the top point of the 50° beveled edge. This will provide the roof pitch with a 6" drop, from 66" to 60".
- 6 Label the panels with a pencil. With the smooth side facing you, the panel with the 60" side on the left is the left panel. The other panel is the right panel.
- 7 Set the base of your circular saw at the proper angle to cut a 13° bevel, and cut off the top end of each panel. Be sure that the smooth side will always be out before you cut any angles. In this case, the long side of the angle should be the smooth side.
- 8 Cut 16" x 20" and 15" x 5" pieces out of scrap plywood. These will be your templates for cutting the rough openings in the side panels.
- 9 To correctly locate the templates, measure along the 60" side of the left panel and place a mark $26\frac{1}{4}$ " up from the bottom. Using a framing square, scribe a line across the panel. This will be your base line. Scribe another line 2" in from the 60" side, and mark it the entire length of the side. This will be your edge line. Finally, on the 66" side, place a mark $29\frac{1}{4}$ " up from the bottom. Using a framing square, scribe a line approximately 6" long. This will be your angle line.
- 10 Place the 16" x 20" template so one corner is on the base line, one on the edge line and one on the angle line. Hold the template tight to the panel and trace a line around the entire template.
- 11 Along the 66" side, place a mark 2" above the top corner of the template outline. Use the square, and scribe the line across the panel. This will be your second baseline. Measure up $2\frac{3}{4}$ " from this line along the 60" side, and place a mark. Scribe a line approximately 6" long. This will be your second angle line.
- 12 Place the 15" x 5" template so one corner is on the second base line and one is on the intersection of the second angle line and the edge line. Hold the template tight to the panel and trace a line around the entire template.

13 Lay out the right panel in similar fashion, but remember to reverse the order of the openings (see *Front View*).

14 Using a jigsaw or a circular saw and a straightedge guide clamped to the side panel, carefully cut out the marked window openings.

15 On the front side of the side panels, cut a $\frac{1}{4}$ " x $\frac{1}{4}$ "-deep rabbet around all the openings with a router and a pilot-bearing bit.

Back Panel

- 1 Cross-cut another sheet of $\frac{1}{2}$ "-thick plywood to 60", using a circular saw or panel saw to cut out the back panel (B).
- 2 Set the table saw blade to the proper angle to cut a 40° beveled edge (see *Detail 1*). Set the rip fence to 29". Cut a beveled edge along one of the 60" edges. Be sure to keep the smooth side down when cutting.
- 3 Set the rip fence so the cut leaves a $28\frac{3}{4}$ "-wide workpiece. Rotate the workpiece 90° (same side down), and cut off the factory edge of the remaining 60" edge.
- 4 Mark an outline for the door by measuring and scribing lines 3" from the top, $5\frac{1}{2}$ " from the sides, and 5" from the bottom. Cut out the door, using the same method as in step 14 of the side panel section.

Corner Braces and Nailing Strips

- 1 Set the table saw blade to cut a 40° beveled edge, and cut a bevel on one side of a piece of 1" x 2" x 10' stock.
- 2 Reset the table saw blade to 0°, and cross-cut the same workpiece into two 60"-long pieces to make the side braces (F).
- 3 Set the table saw blade to cut a 50° beveled edge, and cut a bevel on one side of a 1" x 2" x 66" to make the front brace (E).
- 4 Set the table saw blade to cut a 13° beveled edge, and cut a bevel on one long side of a piece of 1" x 2" x 5' stock. Reset the saw to 0°, and cross-cut the stock into two 18" and one 24" piece to form the nailing strips (G, H).
- 5 Glue and clamp the front brace to the 66" side of the left panel, and both side braces to the inside edges of the back panel.
- 6 Glue and clamp the 24"-long nailing strip, centered at the top of the back panel. Do the same with the 18" nailing strips at the top of the left and right panels.

Plexiglass Panels

- 1 Cut two pieces of $\frac{1}{4}$ "-thick white plexiglass $16\frac{3}{8}$ " x $20\frac{3}{8}$ ", and two pieces $15\frac{3}{8}$ " x $5\frac{3}{8}$ ". This allows a $\frac{1}{16}$ " cushion on each side when placed in the side panels.
- 2 Cut two pieces of $\frac{1}{8}$ " clear plexiglass $15\frac{7}{8}$ " x $19\frac{7}{8}$ ", and two pieces $14\frac{7}{8}$ " x $4\frac{7}{8}$ ".
- 3 Insert the white plexiglass into the appropriate panel openings. Set aside the clear plexiglass panels.

Window Molding

1 Set the table saw blade at 0° and the rip fence at $\frac{7}{8}$ ", and rip a piece of 1" x 4" x 10' stock into two 1" x $\frac{7}{8}$ " x 10' strips for the window molding (J).

2 Cut a $\frac{1}{4}$ " x $\frac{3}{16}$ "-deep rabbet along one side of both strips (see *Detail 4*), using a router table and $\frac{1}{4}$ " bit.

3 Using a $\frac{1}{4}$ " radius beading bit in your router table, shape the two top edges of the window molding (see *Detail 4*).

4 Cross-cut one 1" x $\frac{7}{8}$ " x 10' strip in half. Rip the $\frac{5}{8}$ " x $\frac{3}{16}$ " lip off the entire length of one half (see *Detail 4*). The resulting $\frac{9}{16}$ " x $\frac{3}{4}$ " x 60" strip will be used for the entry slot in the frame for the clear plexiglass.

5 Cross-cut the strips into four $6\frac{1}{4}$ " lengths, four $21\frac{1}{4}$ " lengths, and eight $16\frac{1}{4}$ " lengths. NOTE: Make sure to cut two of the $16\frac{1}{4}$ " lengths and two of the $6\frac{1}{4}$ " lengths from the $\frac{9}{16}$ " x $\frac{3}{4}$ " x 60" entry slot strip.

6 Miter the molding strips to fit each opening.

7 Glue and nail the frame molding to the panel with $1\frac{1}{8}$ " finishing nails. NOTE: Overlap the white plexiglass with the molding by $\frac{1}{2}$ " on each side. Use the frame entry slot on the "uphill" side of each opening. Predrill the nail holes to prevent splitting.

Making the Door Stops

1 Rip $\frac{1}{2}$ "-thick plywood into two pieces $1\frac{1}{2}$ " wide and $74\frac{3}{4}$ " long to make the door stop strips (K).

2 Cross-cut each $74\frac{3}{4}$ "-long strip $20\frac{3}{4}$ " from one end.

3 Miter the door stop strips to border the inside of the door opening in the back panel, overlapping the entire opening by $\frac{1}{2}$ ". Glue and clamp in place until the glue dries.

Assembling the Panels

1 Apply a bead of woodworker's glue to the front brace on the left panel.

2 Nail the right panel to the left panel using $1\frac{1}{8}$ " finishing nails and let stand 30 minutes for the glue to set up.

3 Apply glue to both side braces on the back panel, then nail the left and right panels to the back panel, using $1\frac{1}{8}$ " finishing nails through the nailing strips. Let stand 30 minutes for the glue to set.

4 Nail the glide feet into the bottom of the front brace and the two side braces.

5 Attach a 48"-long piano hinge to the door cut in the back panel. Mount hinge and door to back panel. A self-centering drill bit will make attaching the hinge easier.

Making the Top

1 Cut $\frac{1}{2}$ "-thick plywood into a piece 21 " x $33\frac{1}{4}$ ".

2 Find and mark the midpoint of the length of the workpiece. Scribe a line from the marked point to both corners on the long side opposite the midpoint, to form a $26\frac{1}{2}$ " x $26\frac{1}{2}$ " x $33\frac{1}{4}$ " triangle.

3 Set the cutting depth of your circular saw to $\frac{3}{4}$ ", and cut along your scribed lines to form the display top (C).

4 Set your circular saw blade to cut a 13° bevel, and cut a bevel along the edge of the display top. Align the cut carefully, so you retain the $26\frac{1}{2}$ " x $26\frac{1}{2}$ " x $33\frac{1}{4}$ " dimensions on the bottom side of the workpiece.

5 Set the table saw blade to cut a 13° bevel, and the rip fence to $2"$. Rip two pieces of 1" x 2" stock $26\frac{1}{2}$ " long, to make the top trim (D).

6 Set your table saw to cut a 50° bevel, and cut a 50° miter on one end of each top trim piece, where the trim pieces join at the front of the display. Be sure to keep the long side of the angle to the bottom, or in this case, toward the triangle-shaped top piece.

7 Set your table saw to cut a 40° bevel, and cut a 40° miter on the other end of each top trim piece.

8 Glue the top trim pieces to the edge of the top piece, and nail in position with $1\frac{1}{8}$ " finishing nails.

9 Glue the top piece to the assembled base and nail in position with $1\frac{1}{8}$ " finishing nails. Keep an equal overhang on the front two sides, but align the back side flush with the outside face of the back panel (B).

Finishing the Display

1 Sand the entire display, starting with 80-grit sandpaper, and working gradually through 100-grit to 150-grit sandpaper.

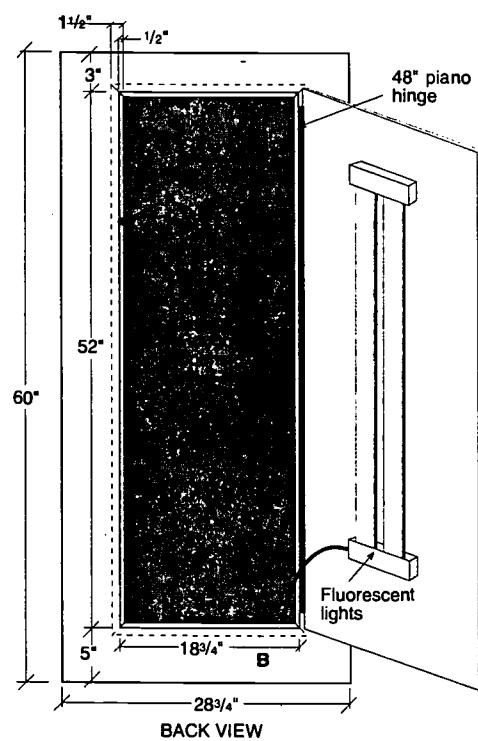

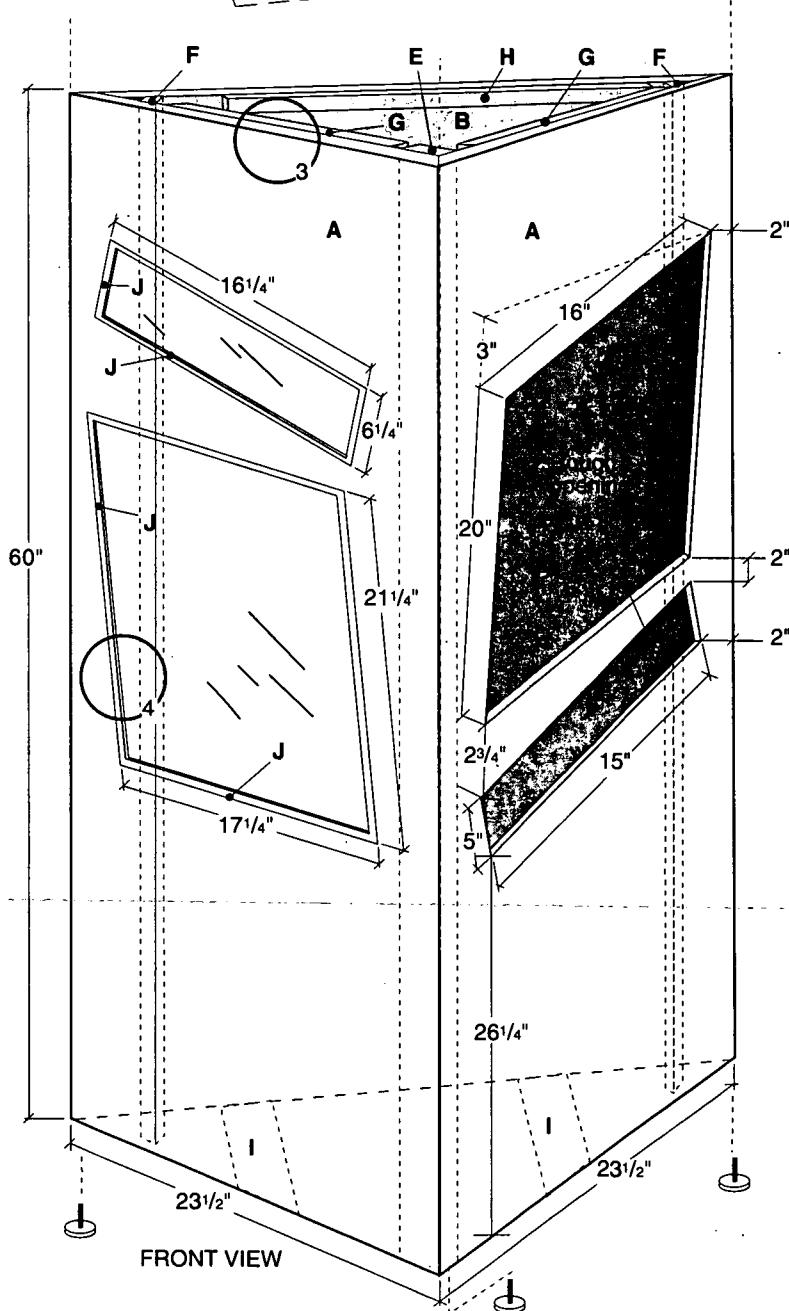

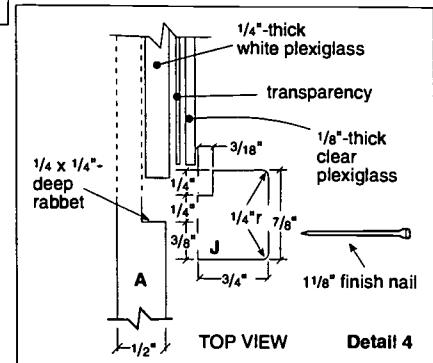

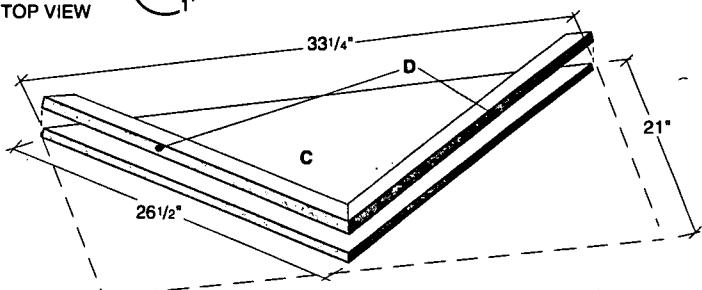

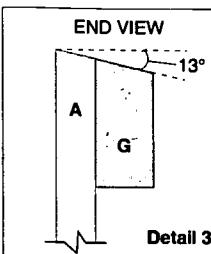

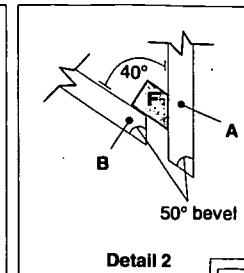

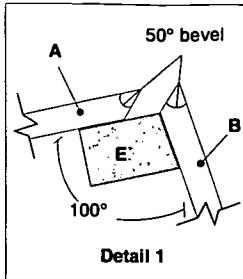

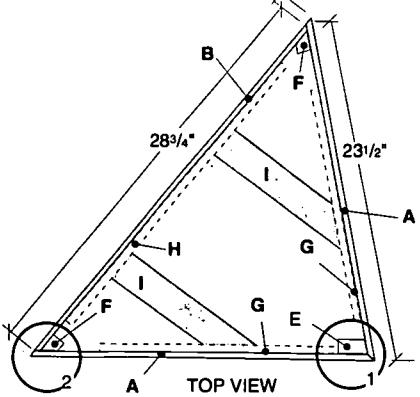

2 Fill nail holes and knot holes with wood filler, then finish-sand the entire workpiece.

3 Apply multiple coats of paint for desired effect. NOTE: paint the inside with a white gloss paint to enhance the reflectiveness and brightness of the lights.

4 Attach a handle and door latches at this point. Consider installing a keyed latch and a recessed handle.

5 Assemble the fluorescent light fixtures and mount on the inside of the door panel with screws (be careful not to pierce the outside of the back panel). Drill an entry hole for the power cord through the lower portion of the back panel, and install a rubber cable grommet. As you build and use the kiosk, be sure to check and comply with state and local fire safety and electrical codes in your area.

6 To use display, apply transparencies to the clear plexiglass with clear tape around the edges, making a graphic panel. Slide the assembled graphic panels into each window through the frame entry slots. Plug the display into an electrical outlet.

Cutting List

A	2	Side panel	1/2 x 23 1/2 x 66"
B	1	Back panel	1/2 x 28 3/4 x 60"
C	1	Top	1/2 x 21 x 33 1/4"
D	2	Top trim	1 x 2 x 26 1/2"
E	1	Front brace	1 x 2 x 66"
F	2	Side brace	1 x 2 x 60"
G	2	Nailing strip	1 x 2 x 18"
H	1	Nailing strip	1 x 2 x 24"
I	2	Lower brace	1 x 4 x 8"
J	1	Window molding	7/8 x 3/4 x 22"
K	1	Door stop strip	1/2 x 2 x 4 1/4"

Miscellaneous: 48" piano hinge, slide latch, 1/4"-thick white plexiglass, 1/8"-thick clear plexiglass, 1 1/8" finish nails, wood glue, white latex paint, nylon floor glides, fluorescent light panel.

Ingredients	50 Servings			100 Servings			For Servings	Directions
	Weight	Measure	Weight	Measure	Weight	Measure		
Topping:								
Rolled oats	3 oz	1 cup	6 oz	2 cups		5. Combine topping ingredients and mix until crumbs are pea-sized.
All-purpose flour	1 oz	1/4 cup	2 oz	1/2 cup		6. Pour 3 qt (7 lb 7 oz) of batter into each lightly greased 12" x 20" x 2 1/2" steam table pan and spread evenly.
Brown sugar	2 oz	1/4 cup	4 oz	1/2 cup		Sprinkle 1 3/4 cups of topping over each pan.
Margarine or butter	2 oz	1/4 cup	4 oz	1/2 cup		
								7. To Bake:
								Conventional Oven
								325°F, 45 minutes
								Convection Oven
								325°F, 35 minutes
								Bake until golden brown and muffin pulls away from sides of pan.
								8. Cut each pan 10x5.

SERVING: 1 piece
provides 1 serving of grains/breads

YIELD: 50 servings: 7 lb 1 oz
100 servings: 14 lb 2 oz
VOLUME: 50 servings: 3 qt 1/2 cup
100 servings: 1 gal 2 qt 1 cup

Variations

a. Peach Muffin Squares

In Step 6, refrigerate batter (already in pans) for 1 hour prior to adding topping. Then spread 3 lb 2 oz of canned, sliced peaches (drained) over each pan. (Fruit may be pureed.) Sprinkle 1 3/4 cups of topping over fruit. Bake as directed.

b. Blueberry Muffin Squares

In Step 6, refrigerate batter (already in pans) for 1 hour prior to adding topping. Then spread 3 lb 2 oz of frozen blueberries (thawed and drained) over each pan. (Fruit may be pureed.) Sprinkle 1 3/4 cups of topping over fruit. Bake as directed.

SERVING: 1 cup (2 No. 8 scoops)
provides 2 ounces of meat and
 $\frac{5}{8}$ cup of vegetable

YIELD: 50 servings: 23 lb 4 oz
100 servings: 46 lb 8 oz

Variations

a. Beef Stir-Fry

50 servings: Follow Steps 1-4. In Step 5, use 10 lb 4 oz of boneless beef top round, cut in $\frac{1}{2}$ " cubes. Sauté beef cubes for 2 to 3 minutes, until no signs of pink remain.

100 servings: Follow Steps 1-4. In Step 5, use 20 lb 8 oz of boneless beef top round, cut in $\frac{1}{2}$ " cubes. Sauté beef cubes for 2 to 3 minutes, until no signs of pink remain.

b. Pork Stir-Fry

50 servings: Follow Steps 1-4. In Step 5, use 11 lb 9 oz of boneless pork shoulder or loin, cut in $\frac{1}{2}$ " cubes. Sauté pork cubes for 3 to 5 minutes, until no signs of pink remain.

100 servings: Follow Steps 1-4. In Step 5, use 23 lb 2 oz of boneless pork shoulder or loin, cut in $\frac{1}{2}$ " cubes. Sauté pork cubes for 3 to 5 minutes, until no signs of pink remain.

Special Tips: 1) For an authentic Oriental flavor, substitute $\frac{1}{4}$ cup of sesame oil for $\frac{1}{4}$ cup of vegetable oil to sauté chicken, for each 50 servings.
2) Fresh vegetable mixes can be varied to include combinations of bean sprouts, broccoli, cabbage, celery, Chinese pea pods, onions, peppers, and water chestnuts.

						Bake until golden brown.
						7. For glazed appearance, baste after 10 minutes.

(over)

SERVING:

1 piece
provides 2 ounces of cooked poultry

YIELD: 50 servings: 9 lb 3 oz
 100 servings: 18 lb 6 oz

Special Tips: 1) To remove skins easily, use a paper towel to grasp skin.

2) A honey-lemon sauce can be made from the baked pan liquids. For each 50 servings, dissolve 1 cup cornstarch in $\frac{1}{2}$ cup cold water. Drain liquid from cooked chicken, remove fat, and strain. Heat 1 qt of honey-lemon sauce until it simmers, 180°F. Add cornstarch-water mixture and simmer until thickened. Pour over chicken before serving. This can be used as a sauce for vegetables or rice.

3) The unbaked honey-lemon sauce may also be used as a marinade. Pour the sauce over the chicken thighs and refrigerate overnight before baking.

Cucumber Sauce

Sauces, Gravies, and Seasoning Mixes G-13

Ingredients	50 Servings			100 Servings			For Servings	Directions
	Weight	Measure	Weight	Measure		
*Fresh cucumbers, peeled, seeded	1 lb 10 oz	3 lb 4 oz	1. Grate cucumbers using a food processor or a grater. Place grated cucumbers in colander, and press to remove juice.
*Onions, minced	2 oz	1/4 cup	4 oz	1/2 cup	2. In a separate bowl, mix together the rest of the ingredients.
Lowfat mayonnaise	8 oz	1 cup	1 lb	2 cups	
White vinegar	2 Tbsp 1 tsp	1/4 cup 2 tsp	
Lowfat plain yogurt	1 lb	2 cups	2 lb	1 qt	
Parsley flakes	2 Tbsp	1/4 cup	
Salt	1/4 tsp	1/2 tsp	
White pepper	1/4 tsp	1/2 tsp	
								3. Fold cucumbers into mixture. 4. Chill at least 2 hours before serving. 5. Serve with Gyro Sandwich (F-9).

*See Marketing Guide.

(over)

SERVING: 2 Tbsp (1 ounce ladle)

YIELD: 50 servings: 3 lb 2 oz
100 servings: 6 lb 4 oz
VOLUME: 50 servings: 1 qt 2½ cups
100 servings: 3 qt 1 cup

- Special Tips:** 1) For a quick Cucumber Sauce, add 1 lb 10 oz grated cucumbers to 3 cups of Ranch Dressing (E-19) for 50 servings. For 100 servings, add 3 lb 4 oz grated cucumbers to 1 qt 2 cups of Ranch Dressing.
- 2) For best results, to develop flavor, prepare the night before.

*Fresh cabbage, shredded (optional)	1 lb	1 qt 1/2 cup	2 lb	2 qt 1 cup	

*See Marketing Guide.

(over)

SERVING: 1 cup (8 ounce ladle)
provides $\frac{1}{4}$ serving of cooked dry beans,
 $\frac{3}{8}$ cup of vegetable, and $\frac{1}{2}$ serving of
grains/breads

YIELD 50 servings: 2 8 lb 13 oz
100 servings: 5 7 lb 10 oz
VOLUME: 50 servings: 3 gal 1 qt
100 servings: 6 gal 2 qt.

Special Tip: Garnish with Parmesan cheese.

Preparation Note

Soaking Beans

Overnight method: Add $1\frac{3}{4}$ qt cold water to every 1 lb of dry beans.
Cover and let stand overnight in a refrigerator. Discard the water.
Proceed with recipe.

Quick-soak method: Boil $1\frac{3}{4}$ qt of water for each 1 lb of dry beans. Add
beans and boil for 2 minutes. Remove from heat and allow to soak for
1 hour. Discard the water. Proceed with recipe.
